McElroy, K., & Bridges, L. M. (2015). Access to information is (not) a universal right in higher education: Librarian ethics and advocacy. *International Review of Information Ethics*, 17(2), 35-56. <http://library.oregonstate.edu/McElroyKellyLibraryAccessInformationNot.pdf>

In accordance with the International Federation of Library Associations and Institutions (IFLA) Code of Ethics for Librarians and Other Information Workers, access to information is a fundamental human right. Within a global context, this paper compares 16 countries, including the United States, highlighting barriers to achieving the basic right of equitable access to information. Published in 2015, the paper reveals stark differences in developing countries in terms of costs of access to information in higher education, scholarly publishing costs, and language. This article is short but provides a brief overview of global barriers to information access despite the declared fundamental human right to such access. The authors cited a few references. Both authors are associate professors at Oregon State University.

Real, B., McDermott, A. J., Bertot, J. C., & Jaeger, P. T. (2015). Digital inclusion and the Affordable Care Act: Public libraries, politics, policy, and enrollment in "Obamacare". *Public Library Quarterly*, 34(1), 1-22.

This book contains 282 original letters, song lyrics, casualty lists, transcripts of witness testimony, original newspaper accounts. It's a supplement to the anthology published in 128 volumes "The War of the Rebellion: A compilation of the Official Records of the Union and Confederate Armies". The author is a historian-archaeologist. This book is an excellent source for primary documents and offers a fresh narrative of the civil war in the New Mexico territory. Many people think of the Civil War as a battle between the Union and the Confederacy. This book gives the Civil War history researcher a glimpse at the battles happening in the Southwest, as well.

Document Analysis Systems VI Simone Marinai,Andreas Dengel,2004-12-10

This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8-10 2004 at the University of Florence Italy Several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents Other contributions address the description of complete working systems which is one of the strengths of this workshop Some papers extend the application domains to other media like the processing of Internet documents The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents a taste which frequently requires the analysis of color documents A total of 17 papers are associated with these topics whereas two years ago in DAS 2002 only a couple of papers dealt with these problems In our view there are three main reasons for this new wave in the DAS community From the scientific point of view several research fields reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries

Annotated Bibliography of Economic Geology, 1941 **Big Data Analysis: New Algorithms for a New Society** Nathalie Japkowicz, Jerzy Stefanowski, 2015-12-16. This edited volume is devoted to Big Data Analysis from a Machine Learning standpoint as presented by some of the most eminent researchers in this area. It demonstrates that Big Data Analysis opens up new research problems which were either never considered before or were only considered within a limited range. In addition to providing methodological discussions on the principles of mining Big Data and the difference between traditional statistical data analysis and newer computing frameworks, this book presents recently developed algorithms affecting such areas as business financial forecasting, human mobility, the Internet of Things, information networks, bioinformatics, medical systems and life science. It explores through a number of specific examples how the study of Big Data Analysis has evolved and how it has started and will most likely continue to affect society. While the benefits brought upon by Big Data Analysis are underlined, the book also discusses some of the warnings that have been issued concerning the potential dangers of Big Data Analysis along with its pitfalls and challenges.
