Gorski,Kristien Zenkov,2014-03-14 The Big Lies of School Reform provides a critical interruption to the ongoing policy conversations taking place around public education in the United States today By analyzing the discourse employed by politicians lobbyists think tanks and special interest groups the authors uncover the hidden assumptions that often underlie popular statements about school reform and demonstrate how misinformation or half truths have been used to reshape public education in ways that serve the interests of private enterprise Through a thoughtful series of essays that each identify one lie about popular school reform initiatives the authors of this collection reveal the concrete impacts of these falsehoods from directing funding to shaping curricula to defining student achievement Luminary contributors including Deborah Meier Jeannie Oakes Gloria Ladson Billings and Jim Cummins explain how reform movements affect teachers and administrators and how widely accepted mistruths can hinder genuine efforts to keep public education equitable effective and above all truly public Topics covered include common core standards tracking alternative paths to licensure and the disempowerment of teachers unions Beyond critically examining the popular rhetoric the contributors offer visions for improving educational access opportunity and outcomes for all students and educators and for protecting public education as a common good

inequity faced in the past has been confronted and at least to some extent conquered. But the fact is that we have a two tiered system where some working women have a full panoply of rights while others have few or none at all. We allow blatant discrimination by small employers. Domestic workers are cut out of our wage and overtime laws. Part time workers disproportionately women are denied basic benefits. Laws have been written through a process of compromise and negotiation and in each case vulnerable workers were the bargaining chip that was sacrificed to guarantee the policy's enactment. For these workers the system that was supposed to act as a safety net has become a sieve and they are still falling through. Caroline Fredrickson is a powerful advocate and DC insider who has witnessed the legislative compromises that leave out temps, farmworkers, staff at small businesses, immigrants and others who fall outside an intentionally narrow definition of employees. The women in this fast growing part of the workforce are denied minimum wage, maternity leave, health care, the right to unionize and protection from harassment and discrimination all within the bounds of the law. If current trends continue their fate will be the future of all American workers. An informative, occasionally shocking exploration of the state of women's rights in the workplace. Kirkus Reviews
