Santos, Benigna T. Aquino, 1971 *Magnetic Methods and the Timing of Geological Processes* Luigi Jovane, Emilio Herrero-Bervera, Linda Alide Hinnov, Bernard Arthur Housen, 2013

Magnetostratigraphy is best known as a technique that employs correlation among different stratigraphic sections using the magnetic directions defining geomagnetic polarity reversals as marker horizons. The ages of the polarity reversals provide common tie points among the sections allowing accurate time correlation. Recently studies of magnetic methods and the timing of geological processes have acquired a broader meaning now referring to many types of magnetic measurements within a stratigraphic sequence. Many of these measurements provide correlation and age control not only for the older and younger boundaries of a polarity interval but also within intervals. Thus magnetostratigraphy no longer represents a dating tool based only on geomagnetic polarity reversals but comprises a set of techniques that includes measurements of geomagnetic field parameters, environmental magnetism, rock magnetic properties, radiometric dating, and astronomically forced palaeoclimatic change recorded in sedimentary rocks and key corrections to magnetic directions related to geodynamics, palaeocurrents, tectonics, and diagenetic processes.

Japan Weekly Mail, 1894 *Intrepid Explorer* J. David Lowell, 2014-10-03

When seven year old Dave Lowell was camped out at his father's mine in the hills of southern Arizona in 1935 he knew he had found his calling. Life couldn't get any better than this he recalls. I didn't know what science was but wisps of scientific thought were already working into my plan. So began the legendary career of the engineer geologist explorer and international businessman whose life is recounted in his own words in this captivating book. An Arizona native with family roots in territorial times Lowell grew from modest beginnings on a ranch near Nogales to become a major world figure in the fields of minerals, mining and economic geology. He has personally discovered more copper than anyone in history and has developed multibillion dollar gold and copper mines that have changed the economies of nations. And although he has consulted for corporations in the field of mining he has largely operated as an independent agent and explorer, the architect of his own path and success. His life's story unfolds in four stages: his early education in his field, on the job learning at sites in the United States and Mexico; development of exploration strategies; and finally the launch of his own enterprises and companies. Recurring themes in Lowell's life include the strict personal ethical and tactical policies he requires of his colleagues, his devotion to his family, and his distaste for being away from the field in a corporate office even to this day. The magnitude of Lowell's overall success is

evident in his list of mine discoveries as well as in his scientific achievements and the enormous respect his friends and colleagues have had for him throughout his lengthy career which he continues to zealously pursue Weekly Compilation of Presidential Documents ,2006 *The National Geographic Magazine* ,1900 Indexes kept up to date with supplements
