Although the term "cognitive" is used in many contexts, it is important to understand that it is not a single, unified concept. In psychology, it refers to the mental processes that underlie our thoughts, feelings, and behaviors. In education, it refers to the knowledge and skills that students need to learn. In business, it refers to the information and intelligence that companies need to make decisions. In all of these contexts, the term "cognitive" is used to describe the mental processes that are involved in learning, thinking, and acting.
