Environmental Multimedia is dedicated to the relevant aspects of chemistry behind the fate and transport processes It  
provides relatively simple examples and problems to teach these principles The second third of the book is based on the  
conceptual derivation and the use of common models to evaluate the importance of model parameters and sensitivity analysis  
complex equation derivations are given in appendices Computer exercises and available simulators teach and enforce the  
concepts and logic behind fate and transport modeling The last third of the book is focused on various aspects of assessment
