

EARTHQUAKE

An earthquake happens when the ground shakes. It's like a big wave beneath our feet. Buildings can shake and sometimes fall. People feel scared during earthquakes. They can happen suddenly, without warning. Earthquakes can cause a lot of damage. Sometimes, they make the ground crack open. People need to be careful during earthquakes. They should find a safe place to hide. After an earthquake, people help each other and fix what's broken. Scientists study earthquakes to understand them better and to keep people safe. Earthquakes remind us of the power of nature.

Essays in Humanistic Mathematics Alvin Murray White,1993 The mathematics presented in this volume goes beyond the facts formulas and algorithms that most students associate with mathematics to a presentation of mathematics as an intellectual discipline with a human perspective and a history that matters Humanistic mathematics challenges dogmatic teaching styles that expect students to parrot the lecturer It demands creativity from both the teacher and student Humanistic mathematics carries with it an awareness of and a sensitivity to those things mathematics shares with the other humanities Humanistic dimensions of mathematics include An appreciation of the role of intuition in understanding and creating concepts that appear in their finished version to be the result of a merely technical process An understanding of the value judgements in the growth of any discipline Logic alone never completely accounts for what is investigated how it is investigated or why it is investigated The movement which began as the personal vision of a few has now become a major part of mathematical culture What was viewed with skepticism is now accepted and expected Humanistic mathematics is a recent rediscovery of an idea that goes back to Plato D Alembert Wilder Bronowski Cassirer It has provided a vocabulary for previously unarticulated concepts and approaches There are no answers to the question what is important in mathematics We can only ask what is important in mathematics to human beings with given abilities and limitations at a given point in their mathematical development
