

Guided Practice

Do You Understand?

- Use number names and numerals to write $900,000 + 60,000 + 3,000 + 100 + 4$.
- Reasoning** What is the greatest number that has one comma when written with numerals and with number names?

Independent Practice

- Write the number using number names. Record the number in the place-value chart.
 $300,000 + 10,000 + 6,000 + 20 + 9$

For 7–9, write each number in expanded form.

7. 7,622

8. 294,160

9. 43,702

For 10–12, write the number names.

10. 1,688

11. 331,872

12. 44,444

Do You Know How?

- Write 7,320 in expanded form.
- Write 55,426 using number names.
- In a recent year, 284,604 fans attended the hockey playoffs in Chicago. What digit is in the thousands place in 284,604?

You can use a place-value chart to help write numbers.

In There with the Kids David Kobrin, 2004-12-15 The best teachers say David Kobrin thinks about who their students are and how they learn. In this age of standardized tests and teacher-proof lesson plans, they recognize that teaching is a rich and complex activity that demands professional skill, sound judgment, and quick thinking. This second edition of In There with the Kids presents the parallel working lives of two teachers: elementary teacher Mel Stainko and high school teacher Hilary Coles. We see these teachers' composites drawn from the author's experience and observations in schools as they plan lessons, interact with students, reflect on what happens in the classroom, and try always to do better. Through them we are prompted to think carefully about why some lessons work and others don't. Kobrin brings us into the classroom where we hear the voices of individual students and see how their concerns influence what happens each day. He provides detailed reconstructions of student debates and includes the handouts, exams, and assessment instructions used for selected lessons. At the close of each chapter, he analyzes the characters' actions, the motives behind them, and their effects on events in the classroom. Both practical and inspiring, In There with the Kids demonstrates that by tailoring lessons to students' life experiences, teachers can help students reach new levels of achievement. Teaching and Learning Algebraic Thinking with 5- to 12-Year-Olds Carolyn

Kieran, 2017-12-04 This book highlights new developments in the teaching and learning of algebraic thinking with 5 to 12 year olds. Based on empirical findings gathered in several countries on five continents, it provides a wealth of best practices for teaching early algebra. Building on the work of the ICME 13 International Congress on Mathematical Education Topic Study Group 10 on Early Algebra, well-known authors such as Luis Radford, John Mason, Maria Blanton, Deborah Schifter, and Max Stephens, as well as younger scholars from Asia, Europe, South Africa, the Americas, Australia, and New Zealand, present novel theoretical perspectives and their latest findings. The book is divided into three parts that focus on i) epistemological

mathematical aspects of algebraic thinking ii learning and iii teaching and teacher development Some of the main threads running through the book are the various ways in which structures can express themselves in children s developing algebraic thinking the roles of generalization and natural language and the emergence of symbolism Presenting vital new data from international contexts the book provides additional support for the position that essential ways of thinking algebraically need to be intentionally fostered in instruction from the earliest grades Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core Standards Bob Lenz,Justin Wells,Sally Kingston,2015-01-27

It s not what students know but what they do with what they know that is important Schools are changing in response to this reality and in Transforming Schools Using Project Based Learning Performance Assessment and Common Core Standards Bob Lenz Justin Wells and Sally Kingston draw on the example of the Envision Education schools as well as other leading schools around the country to show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education In this book the authors explain how project based learning can blend with Common Core aligned performance assessment for deeper learning You ll discover how many schools have successfully made the transition from traditional teacher centered learning to project based deeper learning and find many practical ideas for implementation Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom Evidence based descriptions show why deeper learning is right for students Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing Extensive game plan section provides step by step guidance for change Schools are complex organizations and transformation involves all of the stakeholders from students to superintendents But as this book shows there are amazing benefits to be realized when everyone commits to diving deeper into learning

Envision Mathematics 2020 Common Core Student Edition Grade 4 Scott Foresman,2018-10-31 Expanding the Numerical Central Conceptual Structure Laura Christine Bofferding,2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders

reason about negative number properties and operations and how their understanding changes depending on the instruction they receive Results of the study indicate that children build on their existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula
