

United States Government

History of the Government

For most of the country's history, the government has been run by a small group of people who were not elected. These people were called the "elite." They controlled the government and the economy. They were often rich and powerful. They were also often white and male. This system of government was called "oligarchy." It was not until the late 1800s that the government began to change. In 1865, the 13th Amendment to the Constitution abolished slavery. This was a major step towards equality. In 1870, the 15th Amendment gave African Americans the right to vote. This was another step towards equality. In 1920, the 19th Amendment gave women the right to vote. This was a third step towards equality. These changes were part of a larger movement called "progressivism." Progressives believed that the government should be run by the people, not by a small group of elites. They also believed that the government should be used to help people, not just the rich and powerful. This movement led to many changes in the government, including the creation of the Federal Reserve, the establishment of the Federal Trade Commission, and the creation of the Securities and Exchange Commission.

Current Government Structure

The current government structure is a mix of old and new. It includes the three branches of government: the executive, the legislative, and the judicial. The executive branch is led by the president. The legislative branch is made up of the House of Representatives and the Senate. The judicial branch is made up of the Supreme Court and other federal courts. The government is also divided into different levels: national, state, and local. The national government is responsible for issues like foreign policy, defense, and the economy. The state government is responsible for issues like education, health care, and law enforcement. The local government is responsible for issues like infrastructure, public safety, and zoning.
