Handbook of Occupational Therapy for Adults with Physical Disabilities William Sit, Marsha Neville, 2024-06-01

Handbook of Occupational Therapy for Adults With Physical Disabilities by Drs William Sit and Marsha Neville provides quick and essential information for occupational therapists that are new to the adult practice setting. This handbook is primarily organized by body system into six sections: Occupational performance as a whole, Central nervous system, Peripheral nervous system, cranial nerves and sensory system, Musculoskeletal system, Cardiovascular, lymphatic, respiratory, and integumentary systems, Endocrine, digestive, urinary, and reproductive system. At the beginning of each section, you will find a case study based on clinical experience that embodies the chapter subject. Within each section, information is broken down into important aspects of the evaluation process and then followed by the implications of each system on occupational therapy intervention. Handbook of Occupational Therapy for Adults With Physical Disabilities also includes a summary chart where readers can quickly and easily find the purpose, context, form, cost, and contact information for each assessment. Handbook of Occupational Therapy for Adults With Physical Disabilities is ideal for occupational therapy students, recent graduates, and practitioners who are newly entering an adult physical disability practice setting.

Handbook of Vocational

Rehabilitation and Disability Evaluation Reuben Escorpizo, Sören Brage, Debra Homa, Gerold Stucki, 2014-12-01. This book presents the state of the art in the application and implementation of the WHO's International Classification of Functioning, Disability and Health (ICF) in the areas of vocational rehabilitation as a primary topic and disability evaluation as a secondary topic. Application of the ICF and implementation strategies toward a holistic and comprehensive approach to work disability and vocational rehabilitation programs are presented along with clinical cases and exercises. The ICF as a topic in health and disability has been gaining momentum since its approval by the World Health Assembly in 2001 and great progress has been made since then. However, the integration of the ICF in the realm of vocational rehabilitation has been lacking despite the fact that work and employment are a major area in people's lives, particularly those who have work disability. This book will advance the professional practice of vocational rehabilitation, rehabilitation counseling, occupational medicine, and allied health science.
