Consequently, the results of the present study indicate that the use of the *in vitro* model to predict the outcome of the *in vivo* situation is not always reliable.

They are not the same, however, because the former is a generalization, while the latter is a specific instance of the former.

After your registration, you will receive the following information from the

Some limited improvements occurred. It was this combined situation of more severe weather, more severe droughts, and declining groundwater storage, which drove the water management agencies to consider drought related or groundwater related measures. Many groundwater protection measures have been adopted. Amongst these measures are the following: *Groundwater Management* of the groundwater resources (e.g. 1991), *Well Dewatering* for the water supply, *Groundwater Recharge* and *Groundwater Replenishment* and *Groundwater Reuse*. The latter measure is the subject of this paper. The following sections will discuss the various measures, their merits and demerits, and the way forward.
