challenging questions in this field Can knowledge locked in conventions rules of conduct common sense ethics emotions laws cultures and experiences be mined from data Is it acceptable for automatic systems displaying emotional behaviors to govern complex interactions based solely on the mining of large volumes of data Discussing multidisciplinary themes the book proposes computational models able to approximate to a certain degree human behaviors and abilities in resolving organizational social and physical problems The innovations presented are of primary importance for a The academic research community b The ICT market c Ph D students and early stage researchers d Schools hospitals rehabilitation and assisted living centers e Representatives from multimedia industries and standardization bodies Advances in Databases and Information Systems ,2001 Fuzzy Techniques: Theory and Applications Ralph Baker Kearfott,Ildar Batyrshin,Marek Reformat,Martine Ceberio,Vladik Kreinovich,2019-06-10 This book describes the latest findings related to fuzzy techniques discussing applications in control economics education humor studies industrial engineering linguistics management marketing medicine and public health military engineering robotics ship design sports transportation and many other areas It also presents recent fuzzy related algorithms and theoretical results that can be used in other application areas Featuring selected papers from the Joint World Congress of the International Fuzzy Systems Association IFSA and the Annual Conference of the North American Fuzzy Information Processing Society NAFIPS IFSA NAFIPS 2019 held in Lafayette Louisiana USA on June 18 21 2019 the book is of interest to practitioners wanting to use fuzzy techniques to process imprecise expert knowledge It is also a valuable resource for researchers wishing to extend the ideas from these papers to new application areas for graduate students and for anyone else interested in problems involving fuzziness and uncertainty
