

BEFORE YOU START

This document describes a basic installation in the Windows 7 Operating System of The Sabre® Red™ Workspace for users who:

- Can download files directly from the Internet.
- Have sufficient network bandwidth to download the system files in a reasonable amount of time.
- Have Operating System privileges to install files onto their own hard drive. Privileges should include FULL CONTROL to the SRW directories. In addition, access to the users Local Temporary directory is required during the installation. For example on Windows 7 the files are stored here. MySabre is the user name in this example.

- Are not using the pre-packaged installer, shared cache, or any other advanced installation tools

If your environment does not meet the criteria above, refer to the [Sabre Red Workspace Advanced Installation Guide](#) for alternative ways to install and deploy the application (Advanced Installation Guide only available in English at the moment).

These instructions assume you will not change the recommended default settings and file paths.

CHECK SYSTEM COMPATIBILITY

If your workstation has Windows 7 and Windows Vista and you are going to use Sabre VPN, you need to download and run a special utility before you continue to install Sabre Red Workspace. This utility ensures that the Workspace can connect to the Sabre System via the Sabre VPN.

- [Download and run Sabre VPN utility](#)

After selecting Run this window will appear. Make sure Sabre VPN is checked and select Next. When finished you will be prompted to Re-Start the workstation for the changes to take effect.

If you have used Sabre Red Workspace with the Sabre VPN on these operating systems previously, you do not need to run this utility.
