

## Certified Energy Manager® Training Program

A Certified Energy Manager (CEM®) is an individual who optimizes the energy performance of a facility, building, or industrial plant. The CEM is a systems integrator for electrical, mechanical, process, and building infrastructure, analyzing the optimum solutions to reduce energy consumption using a cost-effective approach. CEM's are often team leaders and help to develop and implement their organizations' energy management strategies.

### About this Program

AEE's premium training program is recognized across industry for providing energy professionals a holistic "big-picture" view of energy management for non-residential buildings and facilities. Over five days, attendees learn everything they need to know to optimize systems to help reduce costs, improve profits, and increase occupant satisfaction.

### What You Will Learn

- Learn energy management from a global perspective, but also understand applicable codes, standards, and policies for your region or country.
- Learn how systems and energy-saving technologies can be used throughout a building, such as HVAC, lighting, motors, boilers, energy storage, CHP, etc.
- Learn how energy management strategies and practices, such as energy audits, or M&V, can help identify energy savings and reduce costs.
- Understand the economic aspects of energy management that you need to know for procurement, supply, and project financing.

### At-a-Glance

- This training program prepares attendees to take the Certified Energy Manager® (CEM®) exam.
- This program is held over 5 days.
- You earn 3.3 CEU | 33 PDH | 6.6 AEE Credits for completing this program.

### Key Takeaways

- Work through practical examples to demonstrate the topics and procedures covered.
- Review the various areas of the Body of Knowledge associated with AEE's certification exam.
- Discuss one-on-one with an instructor how to apply what you have learned to your business and applications to improve profitability.
- Leave with a course workbook that will become an invaluable desk reference.

### Registration

Candidates should contact their local AEE approved training provider for information about available training programs, the certification application process, exam registration, and associated fees. To find your local training provider visit:

program or in the private arena and is intended to help them prepare for several certifications. These include programs with BPI, RESNET, HERS, DOE, NREL and AEE (Association of Energy Engineers). The material in this book contains industry procedures and techniques and is intended to be an educational resource. Topics covered include the house as a system, the auditor's tools, weatherization, sealants, insulation and barriers, retrofitting, heating and cooling, baseload and new construction. A number of additional appendices are included to provide the reader with valuable information in the performance of a residential energy audit. **Handbook of Energy Audits** Albert Thumann, William J. Younger, 2008 **Energy Calculations & Problem Solving Sourcebook** Scott Dunning, Larry S. Katz, 2017. This book is designed to serve as a practical guide to energy professionals preparing to take the Association of Energy Engineers (AEE) Certified Energy Manager (CEM) examination.

**Energy Calculations and Problem Solving Sourcebook** Scott Dunning, Larry S. Katz, 2020-11-27. Based on the Body of Knowledge, this book is designed to serve as a practical guide for energy professionals preparing to take AEE's Certified Energy Manager (CEM) examination. The reference presents an overview of the specific areas of expertise referenced in the current Body of Knowledge in a guided preparatory format, including detailed, specifically targeted reference materials. The full scope of energy calculations and problem solving strategies which must be mastered are presented, covering relevant codes and standards, energy accounting and economics, electrical lighting and HVAC systems, motors and drives, industrial systems, building envelope, building automation and control systems, renewable energy, boiler and steam systems, thermal storage, maintenance, commissioning, alternative financing and much more. Green Building (LEED and Energy Star) programs are also addressed. The appendix provides a broad range of useful reference tables as well as mathematical formulas specific to each specific area of energy management addressed. While aimed at those taking the ANSI certified CEM exam, this text is also an excellent reference to be used throughout an energy manager's professional career. **Energy Calculations and**
