- secondary research and its relationship to the issue
- an analysis of the effects on individuals, practitioners and/or wider society.

**How to answer this question**

As a starting point refer to sources listed in the bibliography of the article you are studying. Then do your own research using:

- Reputable websites
- Journals, magazines, and newspaper articles
- Textbooks

Look for themes in the article you can relate your secondary sources to.

How do the secondary sources support the **importance** of this topic, the main findings of the article or the recommendations made?

## Reliability

Refers to the repeatability of findings.

Word to use when talking about reliability: **Consistency**.

Quantitative methods such as questionnaires, experiments, structured interviews and non-participant observation are more reliable as they are designed in a structured way and are easy to replicate, making them more reliable.

Think of reliability in terms of the research method - is it used in a **consistent** way?
