Handbook of Semantic Web Technologies John Domingue,Dieter Fensel,James A. Hendler,2011-06-19 After years of mostly theoretical research Semantic Web Technologies are now reaching out into application areas like bioinformatics eCommerce eGovernment or Social Webs Applications like genomic ontologies semantic web services automated catalogue alignment ontology matching or blogs and social networks are constantly increasing often driven or at least backed up by companies like Google Amazon YouTube Facebook LinkedIn and others The need to leverage the potential of combining information in a meaningful way in order to be able to benefit from the Web will create further demand for and interest in Semantic Web research This movement based on the growing maturity of related research results necessitates a reliable reference source from which beginners to the field can draw a first basic knowledge of the main underlying technologies as well as state of the art application areas This handbook put together by three leading authorities in the field and supported by an advisory board of highly reputed researchers fulfils exactly this need It is the first dedicated reference work in this field collecting contributions about both the technical foundations of the Semantic Web as well as their main usage in other scientific fields like life sciences engineering business or education
