August 2012 Living Environment Key:

Political and Humanitarian Responses to Syrian Displacement Sarah Deardorff Miller, 2016-10-26 This book examines Syrian displacement since the start of the 2011 conflict. It provides information on displacement the scale scope and trends and in depth analysis on how it affects regional politics the role of international organizations responding to the displaced and EU US responses to Syrian displacement. It relates Syrian displacement to broader peace strategies arguing that displacement is not a mere symptom or byproduct of the conflict but a key variable that must be addressed with any peace plan or strategy for ending the conflict and rebuilding Syria. Thus the way refugees are dealt with is not just a humanitarian concern but also a political security and economic issue.

International Child Law, 2014-06-20 International Child Law examines and discusses the international legal framework and issues relating to children. Analysing both public and private international legal aspects this cross disciplinary text promotes an understanding of the ongoing development of child law children's rights and the protection of the child. Examining the theoretical background to the law and providing a concise and clear overview of the instruments and institutions that protect children internationally this text then focuses on key themes and issues in child law and children's rights. This new edition has been updated and revised throughout including expanded material on the UN Convention on the Rights of the Child as well as discussion of recent landmark developments on the law relating to recruiting child soldiers as a result of Lubanga 2012. The third edition also includes a new case study feature that critically considers key themes and issues in international child law in a real world context. Drawing on a range of legal and other disciplines International Child Law is a valuable resource for those in the course of study and research in this area.

Political Instability in Guinea-Bissau Ricardo Real P. de Sousa, Jens Herpolsheimer, Jara Cuadrado, 2025-04-25 How can we make sense of the persistent political instability in Guinea Bissau a small country that has hosted extensive international interventions and made world news headlines over several decades. This book tackles this question arguing for the need to understand politics in Guinea Bissau as intricately linked to and deeply embedded in transnational regional and trans regional dynamics. Taking a multidimensional approach the book brings together international scholars who have studied politics in Guinea Bissau and Africa for many years at different levels and from diverse perspectives. Together the contributors provide an up to date analysis of crucial actors and processes whilst also putting them in historical perspective. The volume connects the study of politics in Guinea Bissau to a range of empirical phenomena and theoretical debates that have wider relevance far beyond its borders. In this way it enables a better understanding of regional and international politics demonstrating how apparently marginal cases are not marginal at all but are actively entangled in broader multi dimensional politics. With important new perspectives and insights both on Guinea Bissau and wider regional dynamics this book will be an important read for researchers and policy makers involved in African politics and security issues.
