Madness examines the French debate over crime and madness in the fin de siècle She argues that psychiatric theories of
human behaviour and new sociological interpretations of crime combined to undermine the traditional foundations of the
penal system and helped to shape the new science of criminology As a result traditional notions of free will and moral
responsibility were eroded as new and often draconian strategies evolved from managerial practices developed mainly by
medical men This book offers a detailed examination of the radical politique criminelle they devised Harris breaks down the
conventional boundaries between intellectual and social history by linking the often esoteric formulations of the professionals
to the defendants own mental anguish and emotional despair Both aspects were involved in developing the meaning of moral
and social responsibility in modern society She demonstrates how the debate over crime and madness aired during the
courtroom trials repeatedly touched on some of the most widespread anxieties of the era which focused on the politics of
gender and class Through a series of case studies she looks specifically at discussions of feminine hysteria and women's
