

QUESTION 1

1.1 Solve for x :

$$1.1.1 \quad x^2 - 9 = 0 \quad (2)$$

$$1.1.2 \quad x - 5 + \frac{2}{x} = 0 \quad (\text{correct to TWO decimal places}) \quad (4)$$

$$1.1.3 \quad x = 1 + \sqrt{7 - x} \quad (5)$$

$$1.1.4 \quad x^2 + 2x - 15 \geq 0 \quad (3)$$

1.2 Solve simultaneously for x and y in:

$$y + 2x = 3$$

$$y^2 - y = 3x^2 - 5x \quad (6)$$

1.3 Simplify completely, WITHOUT the use of a calculator: $\sqrt[n]{\frac{10^n + 2^{n+2}}{5^{2n} + 4(5^n)}}$ (4)

do them justice And he suggests ways to regain trust which apply to essay based exams throughout the world Reviews Know an A Level student who you were absolutely sure should nail an A but ended up with a B Well they probably should have got that A but were a victim of this scandal Sherwood s work changed my outlook Let him change yours too Robert Campbell former Chief Executive Morris Education Trust Dennis has been challenging our thinking about assessment and the awarding of grades for many years combining detailed research with an engaging manner and clear explanations this is an important contribution to our thinking Bill Watkin Chief Executive Sixth Form Colleges Association Dennis Sherwood asks the questions about exam grades that no one really wants to answer His analysis suggests that much of what we think we know about school exams is based at best on wishful thinking and at worst on wilful misrepresentation of statistics But he also has some positive suggestions for improvement Missing the Mark is an uncomfortable but important read Melvyn Roffe Chair Headmasters and Headmistresses Conference Missing a grade can result in university or college applications being rejected Dennis Sherwood asks the 64 000 question Are grades reliable enough for the purposes they are supposed to serve This book presents an insightful analysis of this important matter including the rules introduced in 2016 to reduce the number of appeals the controversial grading processes in 2020 and 2021 when exams were cancelled why real grades are so unreliable and some solutions too Huy Duong parent Everyone in UK education should reflect upon the problems identified in this powerful book and then decide what to do about them Nick Hillman Director Higher Education Policy Institute Anyone with an interest in how examinations are assessed from those in government regulators schools colleges universities to employers teachers parents and students should read Dennis Sherwood s incisive analysis His conclusions will have a profound impact on our idea of the accuracy reliability and fairness of examinations Mike Larkin Emeritus Professor Queen s University of Belfast and Total Equality For Students Dennis provides a clear step by step outline of what is going so terribly wrong and the easy ways to remedy this Ollie Green A level student About the author Dennis Sherwood is a management consultant with experience of solving complex problems He has a Physics Masters from the University of Cambridge an MPhil in Molecular Biophysics and Biochemistry from Yale University and a PhD in biology from the University of California in San Diego After being a consulting partner at Deloitte Haskins Sells and Coopers Lybrand he became an executive director at Goldman Sachs He now runs his own business specialising in organisational creativity and innovation He is author of 14 books

Optimal Control Problems Related to the Robinson-Solow-Srinivasan Model Alexander J. Zaslavski, 2021-08-07 This book is devoted to the study of classes of optimal control problems arising in economic growth theory related to the Robinson Solow Srinivasan RSS model The model was introduced in the 1960s by economists Joan Robinson Robert Solow and Thirukodikaval Nilakanta Srinivasan and was further studied by Robinson Nobuo Okishio and Joseph Stiglitz Since then the study of the RSS model has become an important element of economic dynamics In this book two large general classes of optimal control problems both of them containing the RSS model as a particular case are presented for study For these two classes a

turnpike theory is developed and the existence of solutions to the corresponding infinite horizon optimal control problems is established. The book contains 9 chapters. Chapter 1 discusses turnpike properties for some optimal control problems that are known in the literature including problems corresponding to the RSS model. The first class of optimal control problems is studied in Chaps 2-6. In Chap 2 infinite horizon optimal control problems with nonautonomous optimality criteria are considered. The utility functions which determine the optimality criterion are nonconcave. This class of models contains the RSS model as a particular case. The stability of the turnpike phenomenon of the one dimensional nonautonomous concave RSS model is analyzed in Chap 3. The following chapter takes up the study of a class of autonomous nonconcave optimal control problems, a subclass of problems considered in Chap 2. The equivalence of the turnpike property and the asymptotic turnpike property as well as the stability of the turnpike phenomenon is established. Turnpike conditions and the stability of the turnpike phenomenon for nonautonomous problems are examined in Chap 5, with Chap 6 devoted to the study of the turnpike properties for the one dimensional nonautonomous nonconcave RSS model. The utility functions which determine the optimality criterion are nonconcave. The class of RSS models is identified with a complete metric space of utility functions. Using the Baire category approach, the turnpike phenomenon is shown to hold for most of the models. Chapter 7 begins the study of the second large class of autonomous optimal control problems and turnpike conditions are established. The stability of the turnpike phenomenon for this class of problems is investigated further in Chaps 8 and 9.

Inequality and Flourishing Mariama Ifode-Blease, 2022-06-30. It is no surprise that Christians have long been involved in education, the quest for human flourishing and wholeness is at the heart of the gospel, and education is critical to that quest. Good education has the power to transform our relationships with ourselves, with each other, with and within communities, and ultimately between nation states. But what is surprising is our theological silence in the face of the deep injustices which lie at the heart of our education system. In *Inequality and Flourishing*, Mariama Ifode Blease explores and exposes these inequalities and calls for a greater remembrance of the bountiful and daunting gift of stewardship we have as we educate young people. Drawing on interviews, she offers a fresh vision of education as being about giving children the best tools to be stewards of their minds and bodies, our communities, and ultimately our planet.

Turnpike Theory for the Robinson-Solow-Srinivasan Model Alexander J. Zaslavski, 2021-01-04. This book is devoted to the study of a class of optimal control problems arising in mathematical economics related to the Robinson-Solow-Srinivasan RSS model. It will be useful for researchers interested in the turnpike theory, infinite horizon optimal control, and their applications, and

mathematical economists The RSS is a well known model of economic dynamics that was introduced in the 1960s and as many other models of economic dynamics the RSS model is determined by an objective function a utility function and a set valued mapping a technology map The set valued map generates a dynamical system whose trajectories are under consideration and the objective function determines an optimality criterion The goal is to find optimal trajectories of the dynamical system using the optimality criterion Chapter 1 discusses turnpike properties for some classes of discrete time optimal control problems Chapter 2 present the description of the RSS model and discuss its basic properties Infinite horizon optimal control problems related to the RSS model are studied in Chapter 3 Turnpike properties for the RSS model are analyzed in Chapter 4 Chapter 5 studies infinite horizon optimal control problems related to the RSS model with a nonconcave utility function Chapter 6 focuses on infinite horizon optimal control problems with nonautonomous optimality criterions Chapter 7 contains turnpike results for a class of discrete time optimal control problems Chapter 8 discusses the RSS model and compares different optimality criterions Chapter 9 is devoted to the study of the turnpike properties for the RSS model In Chapter 10 the one dimensional autonomous RSS model is considered and the continuous time RSS model is studied in Chapter 11

Chinese Students in UK Further Education Rosemary A. Reynolds, 2017-12-15 Chinese students in the UK have been increasing in number for many years yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share Dr Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students experiences from their perspective Beginning with an exploration of why these students choose to come and study in the UK and why they are coming at younger ages the book goes on to discuss topics such as risk technology and diversity in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution Drawing on data from two different education institutions providers of GCSE A level programmes for students aged 16 18 years Dr Reynolds attempts to understand what these students experience during their studies how they manage new social relationships and whether upon course completion they achieved the results they desired at the outset Moreover the book aims to ascertain whether the students feel in hindsight that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere The book examines what further education institutions do well and where they might improve to help develop Chinese students educational experiences As such it will be essential reading for academics researchers and postgraduates in the fields of further education sociology of education international and intercultural education and mobility studies
