2013 Spag Sub Levels:

World Trade Report 2013 World Trade Organization, 2013 The world is changing with extraordinary rapidity driven by many influences including shifts in production and consumption patterns continuing technological innovation new ways of doing business and of course policy The World Trade Report 2013 focuses on how trade is both a cause and an effect of change and looks into the factors shaping the future of world trade One of the most significant drivers of change is technology Not only have revolutions in transport and communications transformed our world but new developments such as 3D printing and the continuing spread of information technology will continue to do so Trade and foreign direct investment together with a greater geographical spread of income growth and opportunity will integrate a growing number of countries into more extensive international exchange Higher incomes and larger populations will put new strains on both renewable and non renewable resources calling for careful resource management Environmental issues will also call for increasing attention Economic and political institutions along with the interplay of cultural customs among countries all help to shape international cooperation including in the trade field The future of trade will also be affected by the extent to which politics and policies successfully address issues of growing social concern such as the availability of jobs and persistent income inequality These and other factors are all examined in the World Trade Report 2013

Food Waste at Consumer Level

Ludovica Principato, 2018-03-29 This book presents what is the state of the art in the field of the food waste phenomenon at consumer level including a thorough literature review and it highlights trends in the field It provides a comprehensive starting point for future research Food waste represents a major public policy issue which is included in the UN Sustainable Development Goals In this context the present work identifies the most important definitions given to food waste and its environmental social and economic impacts With a comprehensive literature review that covers a forty year time span 1977-2017 this book highlights the multiple complex facets of food waste at the consumer level Drawing from behavioural and marketing theories it proposes a new theoretical framework with the aim to better explain food waste behaviour Extensive research is being carried out on the main worldwide initiatives both public and private and food policies aimed at tackling the phenomenon

A National Strategy to Reduce Food Waste at the Consumer Level National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Food and Nutrition Board, Board on Environmental Change and Society, Committee on a Systems Approach to Reducing Consumer Food Waste, 2020-10-14 Approximately 30 percent of the edible food produced in the United States is wasted and a significant portion of this waste occurs at the consumer level Despite food's essential role as a source of nutrients and energy and its emotional and cultural importance U.S. consumers waste an estimated average of 1 pound of food per person per day at home and in places where they buy and consume food away from home Many factors contribute to this waste consumers behaviors are shaped not only by individual and interpersonal factors but also by influences within the food system such as policies food

marketing and the media Some food waste is unavoidable and there is substantial variation in how food waste and its impacts are defined and measured But there is no doubt that the consequences of food waste are severe the wasting of food is costly to consumers depletes natural resources and degrades the environment In addition at a time when the COVID 19 pandemic has severely strained the U S economy and sharply increased food insecurity it is predicted that food waste will worsen in the short term because of both supply chain disruptions and the closures of food businesses that affect the way people eat and the types of food they can afford A National Strategy to Reduce Food Waste at the Consumer Level identifies strategies for changing consumer behavior considering interactions and feedbacks within the food system It explores the reasons food is wasted in the United States including the characteristics of the complex systems through which food is produced marketed and sold as well as the many other interconnected influences on consumers conscious and unconscious choices about purchasing preparing consuming storing and discarding food This report presents a strategy for addressing the challenge of reducing food waste at the consumer level from a holistic systems perspective
