Federal Register ,1978-03 Human Impact on Danube Watershed Biodiversity in the XXI Century Doru

Bănăduc,Angela Curtean-Bănăduc,Franco Pedrotti,Kevin Cianfaglione,John R. Akeroyd,2020-04-20 The second longest European river after the Volga the Danube is one of the world s most important rivers in terms of its geographical and historical significance In recent history it has served as a major international waterway and numerous cities including four capitals have been founded on its banks The 2826km long Danube has a watershed measuring 801 093 km² that is now shared between 19 countries from its source in the Black Forest to the Black Sea into which it pumps an average of 827 km³ of water a year This book describes and explains key landscape values interactions geographical cultural and natural heritage It also identifies the threats and various types of human impact affecting this system in all the countries of the Danube River Basin based on the investigations and perspectives of a team of experienced naturalists and in the context of the early 21st century in which the human nature relationship is still far from balanced These studies demonstrate how biodiversity conservation and ecological studies can help us successfully promote mutual cooperation and combine our efforts to address problems as a responsible continent
