Charnock,T. Purcell,R. Ribera-Fumaz,2014-02-18 Spain is at the epicentre of a crisis that threatens the future of the Eurozone This book explains the deep historical and structural roots of the current crisis in Spain It analyses the nexus between European circuits of financial capital urbanisation and the emergent dynamics of state austerity and popular revolt

**The Political Economy and Media Coverage of the European Economic Crisis** Julien Mercille,2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent it has failed to revive economies The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light even if the latter's aim has been to shift the burden of adjustment onto citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis      *Asian Development Outlook 2015* ,2015

**Economic Growth and Development in Africa** Horman Chitonge,2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent's history drawing the attention of the international media and academics alike This book analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this debate the book examines the construction of Africa's economic growth and development portraits over the years It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences The insightful analysis reveals that if Africa is rising only 20-30 per cent of Africans are aboard the rising ship and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth This book makes the complex and sometimes confusing debates on Africa's economic growth experience more accessible to a wide range of readers interested in the Africa story It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies Political Economy and Development
