Consider two grading systems for determining your final class average. Each system is a weighted average of measures that include test grades, final exam grade, homework, and class participation.

| Grading System I | Grading System II |
|---------------------------|---------------------------|
| Test average - 40% | Test average - 60 |
| Final Exam Grade - 25% | Final Exam Grade - 15% |
| Homework - 25% | Homework - 15% |
| Class Participation - 10% | Class Participation - 10% |

- If your values are the following, which grading system do you prefer and why?
 - Test average = 84
 - Final exam grade = 68
 - Homework = 90
 - Class participation = 95
- If you score 10 points higher on the final exam, how does your final grade average change under each system?
