

Motion and Forces Study Guide

Students will be able to:

- Explain and give examples of how the motion of an object can be described by its position, direction of motion, and speed.
- Graph and interpret distance vs. time graphs for constant speed.
- Understand and apply Newton's 3 Laws of Motion.
- Understand that all changes in motion are caused by forces and that net forces result in accelerations.
- Understand and interpret free body diagrams and the various ways in which they are used to describe the forces acting upon an object.

State standards addressed:

- 8.MS-PS2-1. Develop a model that demonstrates Newton's third law involving the motion of two colliding objects.
- 8.MS-PS2-2. Provide evidence that the change in an object's motion depends on the sum of the forces on the object (the net force) and the mass of the object.
