Edmonds Fundamental Financial Accounting Concepts is a unique entrant in the college market that fits a growing audience of non accounting majors yet provides a solid foundation in accounting principles for future accounting students. The Edmonds approach which focuses on core concepts within a decision making context better prepares future managers for the corporate world in which they will be users of financial information. It is a conceptually based book that stresses meaningful learning over rote memorization. More specifically the text focuses on the relationships between business events and financial statements. The primary objective is for students to develop and explain how a particular business event can affect the income statement, balance sheet, and the cash flow statement. Did the event cause assets to increase, decrease, or stay the same? Similarly, what was its effect on liabilities, equity, revenue, expense, gains, losses, net income, and dividends? Furthermore, how did the event affect cash flow? These are the big picture relationships that both accounting majors and general business students need to understand to function effectively in the business world. The text contains numerous innovative features that are designed to facilitate the students' comprehension of the events affecting financial statements.

Applied Research in Financial Reporting Mohammad Javad Abdolmohammadi, Ralph J. McQuade, 2002. This book aims to solve complex accounting and reporting issues by focusing on applied research which accounting graduates are expected to know about as well as having knowledge of accounting concepts, methods, and procedures typically covered in intermediate and advanced accounting courses.
