Environmental Justice Kristin Shrader-Frechette, 2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population including Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of environmental justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment

Statistics of Earth Science Data Graham J. Borradaile, 2003-05-14 From the reviews All in all Graham Borradaile has written an interesting and idiosyncratic book on statistics for geoscientists that will be welcome among students researchers and practitioners dealing with orientation data That should include engineering geologists who work with things like rock fracture orientation measurements or clast alignment in paleoseismic trenches It won't replace the collection of statistics and geostatistics texts in my library but it will have a place among them and will likely be one of several references to which I turn when working with orientation data The text is easy to follow and illustrations are generally clear and easy to read
