

Name: Eleanor Sparks

Date: 6/24/24

Use the questions below to keep track of key concepts from this lesson's study activity.

**YOUR ASSIGNMENT: Splatapults Away!**

The engineering club has built a catapult and wants to test it out. The local supermarket has donated some overripe fruits and vegetables, and now the club is holding a Splatapult challenge to see who can hit the most targets. The catapult can launch food pretty far and make a real mess! In order to hit a target and win the Splatapult challenge, you'll need to aim the catapult just right. Use the Graphing Tool and your knowledge of quadratic functions to help you model the flight paths of the different projectiles and hit the target.

**Organize your information**

1. Which fruit or vegetable did you select? List the information you know about its path. **(2 points: 1 point for the selection, 1 point for the values)**

Pumpkin. The path will need a maximum height of 62 feet to hit the target that is 50 feet away.

2. Your fruit or vegetable will follow a parabolic path, where  $x$  is the horizontal distance it travels (feet), and  $y$  is the vertical distance (feet).
