America 2020 Stansbury:

Broken City Patrick M. Condon, 2024-05-15 How can urban housing and the land underneath now account for half of all global wealth According to Patrick Condon the simple answer is that land has become an asset rather than a utility If the rich only indulged themselves with gold jewels and art we wouldn't have a global housing crisis But once global capital markets realized land was a good speculative investment runaway housing costs ensued In just one city Vancouver land prices increased by 600 percent between 2008 and 2016 How much wealth have investors extracted from urban land In this engaging readable and clearly reasoned treatise Patrick Condon explains how we have let land our most durable resource shift away from the common good and proposes bold strategies that cities in North America could use to shift it back The Raging 2020s Alec Ross, 2021-09-14 In the face of unprecedented global change New York Times bestselling author Alec Ross proposes a new social contract to restore the balance of power between government citizens and business in The Raging 2020s For 150 years there has been a contract Companies hold the power to shape our daily lives The state holds the power to make them fall in line And the people hold the power to choose their leaders But now this balance has shaken loose As the market consolidates the lines between big business and the halls of Congress have become razor thin Private companies have become as powerful as countries As Walter Isaacson said about Alec Ross's first book The Industries of the Future The future is already hitting us and Ross shows how it can be exciting rather than frightening Through interviews with the world's most influential thinkers and stories of corporate activism and malfeasance government failure and renewal and innovative economic and political models Ross proposes a new social contract one that resets the equilibrium between corporations the governing and the governed Changing the Stigma of Mental Health Among African Americans: Moving From Denial to Acceptance Hendricks, LaVelle, Smith, Dimitra, 2023-09-18 Mental health among African Americans historically has been kept secret and often has been subject to intense denial from both the individuals with mental health concerns and their communities Thus African Americans have remained shielded from treatments that are currently available which may allow them to become mentally healthier and find a sense of psychological homeostasis Recognizing mental illness treatment as a strength and not a weakness is key to mitigating existing issues of mental health in the African American community today Changing the Stigma of Mental Health Among African Americans Moving From Denial to Acceptance provides the history of mental health in the African American community and how denial has hindered and hampered treatment within this community Covering topics such as bipolar disorder dementia and disruptive behavior this book is ideal for educators researchers practitioners the African American spiritual community and all individuals concerned about psychological care for African Americans **Renewing America's Civic Compact** Carol McNamara, Trevor Shelley, 2023-09-25 Renewing America's Civic Compact addresses the chief challenges and principal tensions in the operation of our civil society in order to consider possible paths forward The meritocracy multiculturalism issues of race technology and populist nationalism in

American democracy today are some of the issues that have created more tensions to American public life Chapters address the condition of civil conversation within the university and across American society This collection then engages debates over the continued relevance and durability of liberal ideas and institutions whether we have accessible means and resources to channel digital technology more fruitfully for the sake of human achievement and well being and how some have endeavored to revitalize the American civic vocation through both scholarly and practical education Finally the volume closes with a call to restore civic friendship properly understood as the foundation for renewing America s civic compact

North American Deserts Sean P. Graham, 2025-12-15 Deserts cover about one third of the earth s surface and are the largest terrestrial ecosystem in the world They are the only biome that is actually expanding largely due to human activities and climate change In the United States six unique desert ecosystems stretch across the country the Great Basin Mojave Chihuahuan Sonoran Peninsular and the Painted Desert Both a travelogue and science writing *North American Deserts Ecology of Our Arid Lands* is a celebration of these ruthlessly beautiful landscapes Readers will be transported from the enchanting saguaro forests of Arizona and the precipitous red walls of the Grand Canyon to the monotonous yet impressive landscapes of Nevada s Great Basin and Texas Chihuahuan Desert More than 190 vivid color photographs accompany the lively writing Biologist Sean P Graham has extensive field experience in the deserts of the Southwest and Mexico and in *North American Deserts* he takes readers on a journey through both sides of the border The

first half of the book focuses on global climate patterns giving rise to desert regions and it then delves into how plants and animals survive the physical and biological characteristics of these ecosystems The second half which is split into cold and warm regions features portraits of each desert that explore the unique flora and fauna Although the work is focused on deserts in the United States it also surveys the semiarid landscapes that extend into Canada and Mexico Outdoor enthusiasts national park visitors and self proclaimed desert rats will enjoy this reflective yet informative account of our North American deserts

End Times Peter Turchin, 2023-06-13 THE THOUGHT BOOK OF THE YEAR THE TIMES A GUARDIAN BOOK OF THE YEAR Game of Thrones style intra elite conflict meets big data TLS Extraordinary the culmination of many years of highly original and innovative work Bloomberg One of the most iconoclastic thinkers of our time offers a brilliant new theory of how society works What leads to political turbulence and social breakdown How do elites maintain their dominant position And why do ruling classes sometimes suddenly lose their grip on power For decades complexity scientist Peter Turchin has been studying world history like no one else Assembling vast databases mined from 10 000 years of human activity and then developing new models he has transformed the way we learn from the past *End Times* is the result a ground breaking account of how society works The lessons he argues are clear When the balance of power between the ruling class and the majority tips too far in favour of elites income inequality surges The rich get richer the poor further impoverished As more people try to join the elite frustration with the establishment brims over often with disastrous consequences Elite overproduction led to state breakdown in imperial China in medieval France in the American Civil War and it is happening now But while we are far along the path toward violent political rupture Turchin's models also light the way to a brighter future Drawing insight from those occasions in history where the balance was restored *End Times* also points towards a different future an escape from the patterns of the past
