Winkler, 1998-12-15 **The Confederate and Neo-Confederate Reader** James W. Loewen, Edward H. Sebesta, 2011-01-05 Most Americans hold basic misconceptions about the Confederacy the Civil War and the actions of subsequent neo Confederates For example two thirds of Americans including most history teachers think the Confederate States seceded for states rights This error persists because most have never read the key documents about the Confederacy These documents have always been there When South Carolina seceded it published Declaration of the Immediate Causes Which Induce and Justify the Secession of South Carolina from the Federal Union The document actually opposes states rights Its authors argue that Northern states were ignoring the rights of slave owners as identified by Congress and in the Constitution Similarly Mississippi's Declaration of the Immediate Causes says Our position is thoroughly identified with the institution of slavery the greatest material interest of the world Later documents in this collection show how neo Confederates obfuscated this truth starting around 1890 The evidence also points to the centrality of race in neo Confederate thought even today and to the continuing importance of neo Confederate ideas in American political life The 150th anniversary of secession and civil war provides a moment for all Americans to read these documents properly set in context by award winning sociologist and historian James W Loewen and coeditor Edward H Sebesta to put in perspective the mythology of the Old South **Secret Native American Pathways** Thomas E. Mails, 1988 Thomas E Mails draws upon his extensive knowledge of Native American history and ceremony to present ways of applying Native teachings to today's lifestyles **Sustainable Cities in American Democracy** Carmen Sirianni, 2020-09-25 We face two global threats the climate crisis and a crisis of democracy Located at the crux of these crises sustainable cities build on the foundations and resources of democracy to make our increasingly urban world more resilient and just Sustainable Cities in American Democracy focuses on this effort as it emerged and developed over the past decades in the institutional field of sustainable cities a vital response to environmental degradation and climate change that is shaped by civic and democratic action Carmen Sirianni shows how various kinds of civic associations and grassroots mobilizing figure in this story especially as they began to explicitly link conservation to the future of our democracy and then develop sustainable cities as a democratic project These organizations are national local or multitiered from the League of Women Voters to the Natural Resources Defense Council to bicycle and watershed associations Some challenge city

government agencies contentiously while others seek collaboration many do both at some point Sirianni uses a range of analytic approaches from scholarly disciplines policy design urban governance social movements democratic theory public administration and planning to understand how such diverse civic and professional associations have come to be both an ecology of organizations and a systemic and coherent project The institutional field of sustainable cities has emerged with some core democratic norms and civic practices but also with many tensions and trade offs that must be crafted and revised strategically in the face of new opportunities and persistent shortfalls Sirianni s account draws ambitious yet pragmatic and hopeful lessons for a Civic Green New Deal a policy design for building sustainable and resilient cities on much more robust foundations in the decades ahead while also addressing democratic deficits in our polarized political culture
