Envisioning the Faculty for the Twenty-First Century Adrianna Kezar, Daniel Maxey, 2016-09-12 The institution of tenure once a cornerstone of American colleges and universities is rapidly eroding Today the majority of faculty positions are part

time or limited term appointments a radical change that has resulted more from circumstance than from thoughtful planning As colleges and universities evolve to meet the changing demands of society how might their leaders design viable alternative faculty models for the future Envisioning the Faculty for the Twenty First Century weighs the concerns of university administrators professors adjuncts and students in order to critically assess emerging faculty models and offer informed policy recommendations Cognizant of the financial pressures that have led many universities to favor short term faculty contracts higher education experts Adrianna Kezar and Daniel Maxey assemble a top notch roster of contributors to investigate whether there are ways to modify the existing system or promote new faculty models They suggest how colleges and universities might rethink their procedures for faculty development hiring scheduling and evaluation in order to maintain a campus environment that still fosters faculty service and student centered learning Even as it asks urgent questions about how to retain the best elements of American higher education Envisioning the Faculty for the Twenty First Century also examines the opportunities that systemic changes might create Ultimately it provides some starting points for how colleges and universities might best respond to the rapidly evolving needs of an increasingly global society

The Cambridge Handbook of Technology and Employee Behavior Richard N. Landers, 2019-02-14 Experts from across all industrial organizational IO psychology describe how increasingly rapid technological change has affected the field In each chapter authors describe how this has altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete This Handbook

presents a forward looking review of IO psychology's understanding of both workplace technology and how technology is used in IO research methods. Using interdisciplinary perspectives to further this understanding and serving as a focal text from which this research will grow, it tackles three main questions facing the field: First, how has technology affected IO psychological theory and practice to date? Second, given the current trends in both research and practice, could IO psychological theories be rendered obsolete? Third, what are the highest priorities for both research and practice to ensure IO psychology remains appropriately engaged with technology moving forward? [Proceedings of the Sixth Annual GIFT Users Symposium](#) Robert A. Sottilare, Ph.D., 2018-05-30. GIFT is a free, modular, open source tutoring architecture that is being developed to capture best tutoring practices and support rapid authoring, reuse, and interoperability of Intelligent Tutoring Systems (ITSs). The authoring tools have been designed to lower costs and entry skills needed to author ITSs, and our research continues to seek and discover ways to enhance the adaptiveness of ITSs to support self-regulated learning (SRL). This year marks the sixth year of GIFT Symposia, and we accepted 30 papers for publication in this year's proceedings.

Digital Research Methods for Translation Studies Julie McDonough Dolmaya, 2023-12-22. *Digital Research Methods for Translation Studies* introduces digital humanities methods and tools to translation studies. This accessible book covers computer-assisted approaches to data collection, data analysis, and data visualization and presentation, offering authentic examples of these approaches in both translation studies research and projects from related fields. With a diverse range of examples featuring various contexts and language combinations to ensure relevance to a wide readership, this volume covers the strengths and limitations of computer-assisted research methods as well as the ethical challenges specific to this kind of research. This is an essential text for advanced undergraduate and graduate translation studies students as well as researchers looking to adopt new research methods.
