departure of Heide Gerstenberger's path breaking work is a critique of structural functionalist theory of the state in both its  
modernisation theory and materialist variants Prof Gerstenberger opposes to these a historical theoretical explanation that  
proceeds from the long term structuring effect of concrete social practice This is elucidated by detailed investigation of the  
development of bourgeois state power in the two key examples of England and France The different complexions that the  
bourgeois state assumed are presented as the results of processes of social and cultural formation and thus irreducible to a  
simple function of capitalism This approach culminates in the thesis that the bourgeois form of capitalist state power arose  
only where capitalist societies developed out of already rationalised structures of the Ancien Régime type      *The New

Litowitz,1997 The author presents a two tiered analysis that views postmodern legal thought as both a collective intellectual  
movement and as the work of particular theorists notably Friedrich Nietzsche Michel Foucault Jacques Derrida Francois  
Lyotard and Richard Rorty He concludes that even though postmodern thought does not give rise to a normative theory of  
right that can be used as a framework for deciding cases it can focus attention on genealogy and discourse and can empower  
those who have been denied a voice in the legal system Annotation copyrighted by Book News Inc Portland OR      **Water
