Results and Interpretations of the 2003 Mathematics Assessment of the National Assessment of Educational Progress Peter Kloosterman, Frank K. Lester, 2007 With the enactment of No Child Left Behind and its sanctions for schools that fail to make adequate yearly progress NAEP National Assessment of Educational Progress results

are no longer afterthoughts. Instead the results generate headlines and are at the forefront of discussion of what is working in schools and what needs to be changed. As the scrutiny of NAEP results has increased, the National Center for Education Statistics has provided more detailed reporting of the results and has increased the level of security of the assessment items. Both the level of detail and the concern for item security have played prominent roles in the development of this book. The foregoing changes make understanding NAEP and its consequences crucial for any educator. This book provides a background on NAEP, looks at 2003 mathematics achievement in different content areas, discusses data on who is teaching mathematics in the United States, and examines students' perception of mathematics. Additionally, the book deals with results from NAEP broken down by race, ethnicity, and by gender; analyses certain NAEP results with a focus on what is actually measured by those results; and examines changes in NAEP over the years and what those changes mean for NAEP as a tool for understanding student learning.

Resources in Education, 1987-04 Macmillan/McGraw-Hill Math: Teacher ed., v. 1, 2004 Spelling Grade 4, 1998. This series links spelling to reading and writing. It increases skills in words and meanings, consonant and vowel spelling, and proofreading practice. Riddles, brainteasers, and puzzles make spelling fun. Includes a speller dictionary and an answer key.

Navigating Through Problem Solving and Reasoning in Grade 5, 2007. Problem solving and reasoning are students' processes of actively applying what they know to new problems from diverse areas of mathematics. Knowing a variety of mathematical ideas is insufficient unless students can draw on, integrate, and use them to solve challenging, complex problems. The *Navigating through Problem Solving and Reasoning* books for grades 3-6 present hands-on investigations that nurture reasoning and problem-solving strategies in each of the upper elementary grades. In investigations for grade 5, children reason about place value and divisibility by making a PIN for a security system, explore rates of change by projecting sales at a new pet shop, and determine the best month for a ski trip by analysing snowfall data. Students apply mathematical ideas from the five main content areas: number, algebra, geometry, measurement, and data analysis. As they work, they infer, generalise, reason by analogy, recognise relationships, and make representations, and they also predict, check, and revise and verify their results. The *Navigations* series translates Principles and Standards for School Mathematics into action. Each book includes practical, teacher-tested activities and a supplemental CD-ROM that features applets for students' use and resources for teachers' professional development.

Houghton Mifflin Mathematics, 2000-09 *Everyday Mathematics 4 Grade Teacher's Lesson Guide Volume 2*, Max Bell, 2004. Contains easy-to-follow, three-part daily lesson plans. This assists teachers in focusing on lesson objectives, providing ongoing practice for all students, and addressing individual student needs for a variety of populations. A unit organizer provides learning goals, planning, and assessment support. Content highlights, a materials chart, suggestions for problem solving, cross-curricular links, and options for individualizing. Each guide is grade-level specific.
