

## Initial Certification in Medical Physics

### Part 1 Content Guides and Sample Questions

**PLEASE NOTE: List of Constants and Physical Values for Use on the Part 1 Physics Exam**

The ABR provides candidates with a list of constants, physical values, and related information, which can be found on [this page](#). While the list includes many constants and physical values, the ABR does not warrant the list as a compilation of all constants and physical values needed on the exams. Candidates should review the list carefully before their exams to familiarize themselves with the contents and list organization.

### Content Guides

The content of all ABR exams is determined by a panel of experts who select the items based on a content guide that the ABR publishes. The content guides are assembled using guidance from medical physics organizations. The content guides are general documents, and individual exam items may not appear to be exactly congruent with the content listed in the guide. In addition, since there is only a limited number of items on any exam, selected items will only be a sample from the larger domain of the content guide.

#### Part 1: General Content Guide

- **Atomic / Nuclear Physics, Sources of Radiation, Interaction of Radiation with Matter**
  - Basic atomic and nuclear physics
  - Radioactivity
  - Sources of radioactive material
  - Radioactive material uses and safety
  - Radiation generating equipment: photons, electrons and heavy particles
  - Interactions of photon and particle radiation with matter
  - Dosimetry concepts and units
  - Spatial distribution/transmission of radiation (photons, protons and electrons)
- **Radiation Instrumentation and Measurement**
  - Gas-filled detectors
  - Scintillation detectors
  - Solid state detectors
  - Neutron detectors
  - Emerging and miscellaneous detectors
