"Students should memorize facts only after they have studied the ideas, trends, and concepts that help explain those facts. Students who have learned only facts have learned very little."

### **GRE AWA Analytical Writing ISSUE Essay Sample Solution - 101**

Why is understanding a particular concept always given preference over mugging it up? This is because once you have understood a concept, it is unlikely that you will forget it that easily. On the other hand, something that has been memorized by cramming it up will last in your memory for a couple of days only. The education system stresses a lot on the explanation of concepts and teaching the ideas and trends that are behind the facts which have to be learnt. If understanding the basic concepts was not all that important, then there would be no requirement of teaching in schools. Students could be given a long list of facts and they could be told to just memorize them. However, this is not the case. This is because students will not be able to learn anything by merely memorizing the facts. They should study the concepts that explain the facts before they attempt to memorize those facts.

Acquiring knowledge and the application of that knowledge are two different aspects of learning. It is easy to acquire knowledge by reading and memorizing facts. This way you cannot become learned as you would be unaware about the concepts that have led to the establishment of these facts and you will not be able to apply the knowledge that you have acquired by memorizing. Moreover, you will not be able to analyze other related aspects on your own as you would have learnt very little by memorizing facts. For example, simply memorizing the speeds of light and sound are not as important as understanding the difference between these two speeds and how they are related to each other. Unless you are clear about this concept, you will not be able to either understand or explain the reason behind the lightening phenomenon wherein one sees the lightening first and hears the thunder later, whereas both these events have occurred simultaneously. Being able to explain this phenomenon would mean that you have actually learnt something rather than just being able to rattle out the figures related to the speeds of light and sound.

Children studying in kindergarten are taught the shapes and sounds of the alphabets before they are taught the spellings of common words. There is no school in the world which would advocate memorizing the spellings of words before understanding the phonetics related to the alphabets. Even if a child does memorize the spellings of words without understanding the phonetics involved, how long will he be able to retain those spellings? Even if he does remember those spellings for an unusually long time, will he be able to work out the spellings of more difficult words on his own? The answer to this question would be a definite 'no'. This means that the child would have learnt almost nothing by memorizing the spellings without understanding the concepts of alphabets and phonetics. On the other hand, if he has understood the sounds and shapes of the alphabets, then he will have no difficulty either in memorizing the spellings of

**On GRE Analytical Writing** Monika Chang, 2020-10-19 Are you a student preparing for the GRE AWA? Or a GRE prep tutor wanting to up your game? Where do you start? Have you tried searching online? Frustrated? Confused? Overwhelmed? Whether your goal is to earn a high GRE AWA score or teach others to master it, *On GRE Analytical Writing* provides the framework. Based on over a decade's worth of research, real-world testing, and ongoing refinement, this step-by-step guide to the issue task of the GRE Analytical Writing Assessment section teaches how to structure responses using idea mapping exercise and sample essays of a decade-long writing test instructor. How to approach the issue prompts for complexity of thought. How to develop responses that reflect the assigned instructions on development and support all six instruction types. How to deliver and phrase ideas to demonstrate unique word choices. Thanks to your perfect writing class, I received 4.5/6.0 on the GRE Analytical Writing section, which is, I think, the best performance I could perform with my poor writing skills. Had it not been for your professional class, I would not have achieved it. An excerpt from a former student's personal letter. The sample essays are abound with clear logic and useful precise diction, rendering their qualities similar to those of the ETS's published score 6 essays. It took me approximately 2 hours to analyse and study a single sample essay. Though the essays' length did put pressure on me, I did not want to skip studying any part of them. So I decided to study them all, paraphrase what I could, and write as much as I could on the real test. An excerpt from a former student's course feedback.
