[Acute and Emergency Care in Athletic Training](#) Michelle Cleary, Katie Walsh Flanagan, 2019-03-05

Athletic trainers are often the first ones on the scene when an individual sustains an acute injury Therefore knowing how to assess injuries and illnesses and begin treatment quickly is of vital importance for aspiring athletic trainers Acute and Emergency Care in Athletic Training With Web Study Guide teaches students how to recognize and manage emergency conditions so they can provide appropriate patient care between the field and the emergency department Authors Michelle Cleary and Katie Walsh Flanagan take an interdisciplinary approach drawing from literature position statements and

guidelines from numerous professional health care organizations to offer current evidence based clinical best practices. The book's comprehensive coverage adheres to and incorporates guidelines from the Commission on Accreditation of Athletic Training Education CAATE and the Board of Certification BOC and it is one of the first textbooks to align with the competencies outlined in the CAATE 2020 standards. To prepare students to effectively provide appropriate care before getting an injured or ill athlete to the hospital Acute and Emergency Care in Athletic Training includes the following learning aids. Case studies in the web study guide offer practical scenarios that will facilitate critical thinking and decision making skills. Clinical Skills sidebars guide students through the process of completing specific tasks such as splinting wound care and airway maintenance. Red Flag sidebars indicate areas where significant caution is warranted. Decision making algorithms and decision trees lead students through selecting the most appropriate treatment option based on a patient's signs and symptoms. Key terms are boldfaced in the text and are defined in the glossary section. With a full color presentation and more than 280 photos and illustrations the text takes a systematic approach to acute and emergency care with the content divided into two parts. Part I provides critical information on prevention and risk management strategies including developing an emergency action plan, conducting an emergency examination and administering emergency medications. Part II then provides the basics of emergency evaluations describing how to examine, treat and manage common acute injuries and illnesses to limit the severity of these potentially life threatening conditions. To aid instructors using Acute and Emergency Care in Athletic Training in the classroom there is a full array of ancillaries including a test package, an instructor guide with sample answers to the case study questions and a presentation package plus image bank. When an athlete is injured on the field of play time is of the essence. Acute and Emergency Care in Athletic Training is an invaluable resource for training and preparing the initial responders to recognize critical situations and treat the acutely injured or ill patient.

Handbook of Refugee Health Miriam Orcutt, Clare Shortall, Sarah Walpole, Aula Abbara, Sylvia Garry, Rita Issa, Alimuddin Zumla, Ibrahim Abubakar, 2021-12-17. This book helps to recognize the rights of refugees and provides a framework to identify and approach health needs from basic elements like service mapping and initial interventions to more complex elements of ongoing healthcare and support and broader topics such as migration, public health, migration policy and health systems. Beyond biomedical frameworks it draws on socio ecological models to inform assessments and integrated models of care to improve health and health equity. Set out in three comprehensive sections public health theory, Part 1 applied public health, Part 2 and clinical approaches, Part 3 this book draws on multiple disciplines and insights from humanitarians, academics, policy experts and clinicians from diverse contexts with expertise in forced migration to create an accessible reference tool to inform healthcare professionals interactions with forcibly displaced individuals and populations in all contexts for both high and low resource countries. Apart from providing information across the spectrum of health issues, clinical specialties and global contexts it discusses associated areas including human rights and law, public health, medical anthropology and cultural

awareness Key Features Bridges the gap between existing academic literature on refugee health and guidelines for health management in humanitarian emergencies Helps to develop an integrated approach to healthcare provision allowing healthcare professionals and humanitarians to adapt their specialist knowledge for use in forced migration contexts and with refugees Recognizes the complex and interconnected needs in displacement scenarios and identifies holistic and systems based approaches Covers public health theory applied public health and clinical aspects of forced migration **Holcomb**
