Realization of a Spatial Augmented Reality System - a Digital Whiteboard Using a Kinect Sensor and a PC Projector Andrei A Kolomenski, 2013 Recent rapid development of cost effective accurate digital imaging sensors high speed computational hardware and tractable design software has given rise to the growing field of augmented reality in the computer vision realm The system design of a Digital Whiteboard system is presented with the intention of realizing a practical cost effective and publicly available spatial augmented reality system A Microsoft Kinect sensor and a PC projector coupled with a desktop computer form a type of spatial augmented reality system that creates a projection based graphical user interface that can turn any wall or planar surface into a Digital Whiteboard The system supports two kinds of user inputs consisting of depth and infra red information An infra red collimated light source like that of a laser pointer pen serves as a stylus for user input The user can point and shine the infra red stylus on the selected planar region and the reflection of the infra red light source is registered by the

system using the infra red camera of the Kinect Using the geometric transformation between the Kinect and the projector obtained with system calibration the projector displays contours corresponding to the movement of the stylus on the Digital Whiteboard region according to a smooth curve fitting algorithm The described projector based spatial augmented reality system provides new unique possibilities for user interaction with digital content The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969/1/149299> *Video-based augmented reality for the da Vinci*^T^M tele-manipulator system Dorothy Angie Wang,2006 **Developing AR Games for IOS and Android** Hassan El Habbak,Dominic Cushnan,2013 A practical and fast paced guide that gives you all the information you need to start developing augmented reality games for iOS and Android This book is great for people who are either new to Vuforia and or new to Unity It is a great introductory guide for anyone with a very basic knowledge of xCode and iOS as well as a very basic knowledge of deploying to Android to start developing 3D powered augmented reality apps *Augmented Reality for Multi-disciplinary Collaboration* Rui(Irene) Chen,2010 *Augmented Reality for Multi disciplinary Collaboration* **The Design and Implementation of On-Line Multi-User Augmented Reality Integrated System** Hsiao-shen Wang,Chih-Wei Chiu,2011 *Cognition Cost of Viewer Assistant Augmented Reality for Computer Aided Drawing* Xiangyu Wang,2002
