King, Karl H. Pribram, 2013-04-15 This volume is the result of the third Appalachian Conference on Behavioral Neurodynamics which focused on the problem of scale in conscious experience Set against the philosophical view of eliminative materialism the purpose of this conference was to facilitate communication among investigators who approach the study of consciousness and conscious phenomena from a variety of analytical levels One speculative outcome of the conference is that the columnar arrangement within primary sensory cortices may provide the local isolation necessary for nonlocal interactions to occur In addition the relationship between unit activity and field potentials within a circumscribed region of cortex may provide the other enigmatic aspect of neurophysiological nonlocality namely the common context in the macro scale So instead of a problem looking for a solution scale becomes a solution to a problem Only further research will determine the utility of the ideas expressed here *Scale in Conscious Experience* Joseph King, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company *Ion Transport and Cell Structure in Plants* David T.
