Iterations Of Differential Operators:

    Iterations of Differential Operators A. V. Babin,1989 Translated from the Russian by H Zahavi Topics covered include the activity of linear and nonlinear differential operators the related theories of functions and operators and the connections between the theory of functions and partial differential equations The author focuses on new methods of constructing solutions for partial differential equations and looks at research into the smoothness of these solutions Formulae theorems and lemmas are numbered independently for quick reference and the detailed listing of the subjects covered in each chapter enables the reader to find a particular area of interest without difficulty Annotation copyrighted by Book News Inc Portland OR   **Iteration Theory and Its Functional Equations** Roman Liedl,Ludwig Reich,György Targonski,1985-12   **Scientific and Technical Aerospace Reports** ,1967 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database   **Monotone Iterative Techniques for Nonlinear Differential Equations** G. given for some classes of ordinary and partial differential equations and integral equations Author Iterative Methods for Nonlinear Operator Equations in Banach Spaces Shih-sen Chang,Yeol Je Cho,Haiyn Zhou,2002 Since Banach s fixed point theorem was proved by Banach in 1922 many authors have used this theorem to show the existence and uniqueness of solutions for differential and integral equations a system of simultaneous linear algebraic equations by methods of successive approximations etc and have extended generalised and improved this theorem in several ways The purpose of this book is to give a comprehensive introduction to the study of iterative approximation methods for solutions of nonlinear equations involving some kinds of nonlinear mappings and multi valued mappings in Banach spaces and normed linear spaces by the Mann and Ishikawa iterative sequences with errors and mixed errors and the generalised steepest descent approximations
