### *What is onion tissue made of?*

Do you think peeling an onion will make you cry? Well, here's your chance to test your hypothesis. In this investigation, you will peel a thin layer from a piece of onion. You will stain that layer of tissue on a microscope slide. Then you will examine your slide under a microscope and make sketches of what you see.

#### **Materials**

- Microscope
- Slides
- Coverslips
- Tweezers
- Piece of onion
- Iodine stain

**Safety tip:** Wear gloves, goggles, and an apron while preparing the slides.

### **1** Preparing a slide of onion tissue

Onions have many layers. The inner surface of each layer has a thin layer of tissue that's easy to peel off. Since it is almost transparent, you will need to apply a stain so you can see things under a microscope. Follow the procedures below to make a slide of onion tissue.

1. Place a drop of iodine stain onto a slide.
2. Using the tweezers, gently peel the thin layer of tissue off the inside of a small piece of onion.
3. Using the tweezers, gently lower the onion skin onto the slide. Be careful not to crease the skin.
4. Use the tweezers to place a cover slip over the onion skin.

### **2** Stop and think
