,2004      **ENC focus** ,2000      *Mathematics in Service to the Community* Charles Robert Hadlock, 2005 Publisher  
description This book looks at the wide variety of ways in which math statistics and math education teachers have  
incorporated service learning into their courses These projects are not just stand alone community service initiatives but  
rather they specifically target the improvement of mathematics skills and insights of the college students in the courses with  
which they are associated In some cases the projects are the major focus of the courses In others they may range from an  
essential component to one of several options The book also speculates about heretofore untapped possibilities for service  
learning even including courses in pure mathematics College faculty often may not fully appreciate the wide range of support  
mechanisms for such ventures even within their own institutions so the book includes a lengthy chapter on the details of  
converting a rough idea to a solid action plan sometimes even picking up financial support and other often unexpected  
benefits along the way Creative teachers rarely implement a project in exactly the same way as a colleague might have so the  
emphasis here is to display a wide range of successful projects in order to encourage readers to develop some of their own
