

# Ecological Pyramids

How does energy flow through an ecosystem?

## Why?

Every organism in an ecosystem is either eating or being eaten. When cows eat grass, they obtain some of the energy that the grass transferred from the sunlight it absorbed. If cows could carry out photosynthesis, would they have access to more energy than they get as herbivores? Which organisms in an ecosystem require the most energy to sustain life?

3. The arrows in Model 1 represent the energy available to the next level of the pyramid.
