Emerging Trends in Learning Analytics, 2019-05-07 The term learning analytics is defined as the measurement collection analysis and reporting of information about learners and their contexts for the purposes of understanding and optimizing learning. In recent years learning analytics has emerged as a promising area of research that tracks the digital footprint of the learners and extracts useful knowledge from educational databases to understand students' progress and success. With the availability of an increased amount of data, potential benefits of learning analytics can be far-reaching to all stakeholders in education, including students, teachers, leaders, and policymakers.
