Although much of the content is concerned with aspects of technology and production that are of general validity and hence of enduring relevance, there is also a chapter on various state-of-the-art production designs. The strong market dynamics in recent years is reflected in numerous new transmission types and major lines of evolution treated, including the increasing use of electronics, light weight construction, and the automation of manual gearboxes. The expertise recorded here mainly springs from joint projects between German and international car and gear manufacturers.
