

**CAMBRIDGE INTERNATIONAL EXAMINATIONS**  
GCE Advanced Subsidiary Level and GCE Advanced Level

**MARK SCHEME for the October/November 2013 series**

**9691 COMPUTING**

9691/23

Paper 2 (Written Paper), maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

**Foolproof** Greg Ip, 2015-10-08 Why anti lock brakes make us drive faster Why saving money can lead to financial crises How football helmets make the game more dangerous Why letting forest fires burn can be safer than putting them out We have learned a staggering amount about human nature and disaster yet we are continually unprepared for car crashes, floods and financial crises. Partly this is because the very success we've had making life safer enables us to take more extreme different risks. As our cities, transport systems and financial markets become more interconnected and complex so does the potential for disaster. How do we stay safe? Should we? What if our attempts are exposing us even more to the very risks we are trying to avoid? What if acceptance of danger ultimately makes us more secure and prosperous? Is there such a thing as foolproof? In this fascinating account of risk taking and crisis, Greg Ip presents a macro theory of human nature and disaster that explains how we can keep ourselves safe in our increasingly dangerous world
