William Bouchard,2004 [Thorp and Covich's Freshwater Invertebrates](#) James H. Thorp,D. Christopher Rogers,2014-09-06 Readers familiar with the first three editions of Ecology and Classification of North American Freshwater Invertebrates edited by J H Thorp and A P Covich will welcome the comprehensive revision and expansion of that trusted professional reference manual and educational textbook from a single North American tome into a developing multi volume series covering inland water invertebrates of the world The series

entitled Thorp and Covich's Freshwater Invertebrates edited by J H Thorp begins with the current Volume I Ecology and General Biology edited by J H Thorp and D C Rogers which is designed as a companion volume for the remaining books in the series. Those following volumes provide taxonomic coverage for specific zoogeographic regions of the world starting with Keys to Nearctic Fauna Vol II and Keys to Palaearctic Fauna Vol III. Volume I maintains the ecological and general biological focus of the previous editions but now expands coverage globally in all chapters. It includes more taxonomic groups e.g. chapters on individual insect orders and covers additional functional topics such as invasive species, economic impacts and functional ecology. As in previous editions, the 4th edition of Ecology and Classification of North American Freshwater Invertebrates is designed for use by professionals in universities, government agencies and private companies as well as by undergraduate and graduate students. Global coverage of aquatic invertebrate ecology. Discussions on invertebrate ecology, phylogeny and general biology written by international experts for each group. Separate chapters on invasive species and economic impacts and uses of invertebrates. Eight additional chapters on insect orders and a chapter on freshwater millipedes. Four new chapters on collecting and culturing techniques, ecology of invasive species, economic impacts and ecological function of invertebrates. Overall expansion of ecology and general biology and a shift of the even more detailed taxonomic keys to other volumes in the projected 9 volume series. Identification keys to lower taxonomic levels.
