A Level Geography N2014 Zimsec Paper:

COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe. The authors look through the lenses of the urban health penalty, the right to the city, complexity theory and distributive justice theory. These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions. Uniquely, the authors use remote ethnography tools such as rich texts, video diaries and photo uploads to provide evidence-based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare. The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor, threatening their right to the city. The socio economic impacts can upsurge poverty, increase unemployment and the risks of hunger and food insecurity, reinforcing existing inequalities and breaking social harmony in the cities even past the COVID 19 pandemic period. These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective. The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus, backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy. This means governments should provide social safety nets to informal sector operators whose income-generating activities are affected the most during the time of emergencies like COVID 19. Planners and policymakers should re-envision pandemic resilient cities that are just, equitable, resilient and sustainable.

Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects Christopher B. Field, Vicente R. Barros, 2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) will again form the standard reference for all those concerned with climate change and its consequences, including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy.

Disaster Risk Reduction Approaches in Pakistan Atta-Ur- Rahman, Amir Nawaz Khan, Rajib Shaw, 2015-01-20 This book is a pioneering regional work and provides a balanced approach of theory and practice in disaster risk reduction (DRR) in Pakistan. The book analytically discusses the status of DRR and draws examples and lessons from national and community level programs and projects and events in the country. The book covers different types of disasters facing Pakistan, including geo-physical and hydro-meteorological hazards. This work incorporates and draws some of the key lessons learned from the pre-disaster and disaster phases to the post-disaster phase, providing an effective framework in the form of those lessons. The rich content is based on a selection of available documents, a consultative workshop with academicians from different universities undertaking DRR higher education programs and the editors' own knowledge and experience in the field. Special emphasis is given to analyzing

field experiences from academic perspectives and pinpointing key issues and the policy relevance of DRR Disaster Risk Reduction Approaches in Pakistan is organized into three sections with a total of 20 chapters Section one provides the outline and basics of DRR strategies applied at the national level with supporting examples from a global review Section two specifically highlights the wide ranges of hazards experienced in Pakistan and presents examples policy options institutional set ups risk reduction strategies and key lessons learned The third section of the book is given to approaches and issues of DRR practices with examples of disaster responses *Rural Transformations* Holly Barcus,Roy Jones,Serge Schmitz,2022-03-30 This book focuses on the transformation of rural places peoples and land endemic to the contemporary manifestations of globalization Migration global economic restructuring and climate change are rapidly transforming rural places across the globe Yet global attention characteristically focuses on urban social and economic issues neglecting the continued roles of rural people and places Organized around the three core themes of demographic change rural urban partnerships and innovations and landscape change the case studies included in this volume represent both the Global North and Global South and underscore the complexity and multi scalar nature of these contemporary challenges in rural development planning and sustainability This book would be valuable supplementary reading for both students and professionals in the fields of rural land management and rural planning *Handbook Of Disaster Risk Reduction & Management: Climate Change And Natural Disasters* Christian N Madu,2017-07-25 Climate change is increasingly of great concern to the world community The earth has witnessed the buildup of greenhouse gases GHG in the atmosphere changes in biodiversity and more occurrences of natural disasters Recently scientists have begun to shift their emphasis away from curbing carbon dioxide emission to adapting to carbon dioxide emission The increase in natural disasters around the world is unprecedented in earth s history and these disasters are often associated to climate changes Many nations along the coastal lines are threatened by massive floods and tsunamis Earthquakes are increasing in intensity and erosion and droughts are problems in many parts of the developing countries This book is therefore to investigate ways to prepare and effectively manage these disasters and possibly reduce their impacts The focus is on mitigation strategies and policies that will help to reduce the impacts of natural disasters The book takes an in depth look at climate change and its association to socio economic development and cultures especially in vulnerable communities and investigates how communities can develop resilience to disasters A balanced and a multiple perspective approach to manage the risks associated with natural disasters is offered by engaging authors from the entire globe to proffer solutions **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part B: Regional Aspects: Volume 2, Regional Aspects** Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change

IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy **The State of African Cities, 2014** United Nations Publications,2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change

Africa in World Politics John W Harbeson,Donald Rothchild,2016-12-13 The sixth edition of Africa in World Politics focuses on challenges African states face in constructing viable political economies in contexts both of familiar domestic challenges and an unprecedented mix of engagements opportunities and threats emanating from a turbulent and rapidly changing international order This text including new chapters on Nigeria and the influence of party politics on economic development remains an invaluable resource for students of African politics seeking to navigate the continent s complex political and economic landscapes Revised chapters consider both the extent and the limits of continued healthy growth rates in many countries the impacts of investments by China and other BRICS countries plateaus and some reversals in progress on human rights and democratization dimensions of chronic state weakness deepened by insurgencies including some that are connected to Al Qaeda and the Islamic State and peacebuilding efforts struggling to uphold responsible sovereignty in the Sudans the Great Lakes region and elsewhere *Urban Food Systems Governance and Poverty in African Cities* Jane Battersby,Vanessa Watson,2018-08-22 As Africa urbanises and the focus of poverty shifts to urban centres there is an imperative to address poverty in African cities This is particularly the case in smaller cities which are often the most rapidly urbanising but the least able to cope with this growth This book argues that an examination of the food system and food security provides a valuable lens to interrogate urban poverty Chapters examine the linkages between poverty urban food systems and local governance with a focus on case studies from three smaller or secondary cities in Africa Kisumu Kenya Kitwe Zambia and Epworth Zimbabwe The book makes a wider contribution to debates on urban studies and urban governance in Africa through analysis of the causes and consequences of the paucity of urban scale data for decision makers and by presenting potential methodological innovations to address this paucity As the global development agenda is

increasingly focusing on urban issues most notably the urban goal of the new Sustainable Development Goals and the New Urban Agenda the work is timely The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781315191195> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
