A Level Shona 2015 Syllabus

Femi S. Otulaja,Meshach B. Ogunniyi

A Level Shona 2015 Syllabus:

Ancient and Indigenous Wisdom Traditions in African and Euro-Asian Contexts Ehaab Abdou, Theodore Zervas, 2024-08-01 This book brings attention to the understudied and often overlooked question of how curricula and classroom practices might inadvertently reproduce exclusionary discourses and narratives that omit or negate particular cultures histories and wisdom traditions. With a focus on representations and classroom practices related especially to ancient and Indigenous wisdom traditions and cultures it includes unique contributions from scholars studying these questions in various contexts. The book offers a range of important studies from key African and Euro Asian contexts including Afghanistan, Albania, Greece, Iran, South Africa, Sweden, Turkey, and Zimbabwe. The various chapter contributions address and discuss nuances of each of the contexts under study. The contributions also help highlight some key commonalities across these contexts including how dominant discourses and various forces have historically shaped and continue to shape and reproduce such omissions, misrepresentations, and marginalization. In addition to seeking to reconcile with some of these ancient and Indigenous wisdom traditions and cultures the book charts a path forward towards more holistic analytical frameworks as well as more inclusive and balanced representations and classroom practices in these aforementioned geographic contexts and beyond. It will appeal to scholars, researchers, undergraduate and graduate students with interests in Indigenous education, curriculum studies, citizenship education, history of education, religion, and educational policy.

Enablers, Barriers, and Challenges for Inclusive Curriculum Charamba, Erasmus, Ndhlovana, Shalom Nokuthula, 2025-05-29 United Nations 2030 Agenda for Sustainable Development Goal 4 seeks to ensure inclusive and equitable quality education and to promote lifelong learning opportunities for all learners. Education can only unfold its full potential to transform our world if it is approached from a lifelong learning perspective. In this way, learners' lives are brought closer to education through integrated multi-sectoral approaches that draw the focus from supply to demand. In order to achieve this, institutions and educators need to come up with strategies that are inclusive regardless of the student's intellectual challenges, physical stature, gender, language, culture, or mode of learning. **Enablers, Barriers, and Challenges for Inclusive Curriculum** examines the impact of enablers and barriers on education for students and teachers. It discusses promoting inclusive curriculum in face-to-face, online, and blended learning environments. Covering topics such as educational transitions, large classrooms, and school-going young mothers, this book is an excellent resource for educators, students, teachers, parents, policymakers, professionals, researchers, scholars, academicians, and more.

The Pedagogy of the Social Sciences Curriculum Jamie P. Halsall, Michael Snowden, 2016-08-30 This far-sighted volume describes emerging trends and challenges in university-level social sciences education in an era marked by globalization, austerity, and inequity. It spotlights solution-focused and interdisciplinary methods of teaching developed to match influential academic ideas such as self-directed learning and learning in communities as students seek to engage with and improve conditions in their immediate

environments Chapters offer real world applications of foundational concepts in the modern practice of teaching learning and curriculum development Accordingly the editors emphasize the relationship between pedagogy and curriculum as both are critical in encouraging student autonomy and promoting optimum academic and societal outcomes Included in the coverage Towards a concept of solution focused teaching learning in communities Heutagogy and the emerging curriculum

Collaborative working in the statutory and voluntary sectors Delivering a community development curriculum to students with multiple identities Photography and teaching in community development A model for change sharing ideas and strategies The Pedagogy of the Social Sciences Curriculum will inspire sociologists social workers and health and sociology educators to take a deeper role in community well being as students faculty and communities collaborate to make lasting contributions to society

Religion, Women's Health Rights, and Sustainable Development in Zimbabwe: Volume 2 Sophia Chirongoma, Molly Manyonganise, Ezra Chitando, 2022-08-26 This volume brings to the fore the interface of religion women's sexual reproductive health and rights SRHR and the sustainable development goals SDGs in Zimbabwe It emphasizes that empowering African women is a pivotal pillar for attaining sustainable development Contributors discuss the need for implementing structural changes as a prerequisite for social progress and development to occur in Southern Africa They interrogate the extent to which religious beliefs and practices either promote or impede women's SRHR The contributors also proffer several ways in which addressing the themes of health for all and equality for all women and girls can make a meaningful contribution towards the fulfillment of the goals set for Agenda 2030

Ethical Research Approaches to Indigenous Knowledge Education Mthembu, Ntokozo, 2020-08-14 South Africa's recent higher education protests around fees and decolonizing institutions have shone a spotlight on important issues and inspired global discussion The educational space was the most affected by clashes between languages and ideas the prioritizing of English and Afrikaans over indigenous African languages and the prioritizing of Western medicine literature arts culture and science over African ones Ethical Research Approaches to Indigenous Knowledge Education is a cutting edge scholarly resource that examines forthcoming methodologies and strategies on educational reform and the updating of curricula to accurately reflect cultural shifts The book examines the bias and problems that bias creates in educational systems around the world that have been dominated by Western forms of knowledge and scientific processes Featuring a range of topics such as andragogy indigenous knowledge and marginalized students this book is ideal for education professionals practitioners curriculum designers academicians researchers administrators and students

Regime and Education in Zimbabwe Bekithemba Dube, Albert Mufanechiya, 2024-06-10 This collection focuses on the post independence educational development in Zimbabwe It shows how the ZANU PF regime has presided over the demise of education and covers a wide range of topics such as violence against teachers poor salaries student activism minority languages and curriculum innovations This volume argues that the regime has used education as a tool for repression Curriculum innovations introduced and implemented in Zimbabwe have

little to do with improving the performance of the learners and more to do with stopping teachers from pushing the regime change agenda. Consequently this has resulted in a nation in crisis marked with high turnover, poor economy and mass exodus of teachers and learners. The contributors to this volume make various suggestions which could recenter education towards addressing the experiences of the learners as opposed to being used as a tool to push repression and thwart democracy.

Women's Football, Culture, and Identity Kate Themen, 2024-05-07 This book examines the experiences of amateur players in women's football, challenging conventional discourses that centre male, masculine and heterosexual identities and offering a new narrative that repositions women's voices. Based on original empirical research including extended interviews with female players, the book outlines current debates in women's football around gender identity and intersectionality. It explores football as a space of contestation, examining the creative ways in which women have negotiated opportunities to play football and the friendships and sociality that emerge from playing the game. The book examines resistance to historically bound cultural norms that privileges men's participation, reflecting on mixed sex football, femininity, embodiment, physical capital and authenticity, and considers how this deeper understanding of football cultures might help in the future development of the women's game. This is a fascinating reading for anybody with an interest in football, women's sport, the sociology of sport or gender studies.

Thrive Martha Boyne, Emily Clements, Ben Wright, 2018-05-18 Martha Boyne, Emily Clements and Ben Wright's *Thrive* In your first three years in teaching equips trainee secondary school teachers with the know-how to lay the foundations for a successful career in teaching long after the challenging first few years are over. Martha, Emily and Ben are thriving teachers. In *Thrive* they share their personal experiences and demonstrate how you too can thrive during the tricky training year, the daunting NQT year and the crucial RQT year. Using their collective insights and plenty of evidence-informed strategies and advice, they detail how you can get to grips with the classroom basics from behaviour management and lesson planning to differentiation and providing for SEND, and effectively continue your professional development. This book is not just a survival manual to help teachers get through their first three years in teaching. Nor is it an academic text that has been written by authors who have only a distant memory of what it takes to stand in front of a class of teenagers for the first time. *Thrive* is something very different. It gives both the aspiring and the newly qualified the support and guidance to become a thriving teacher, and has been co-authored by three recently qualified teachers who, in this book, invest their passion and practical knowledge to inspire and inform others who want to pursue enjoyable and rewarding careers in teaching. *Thrive* is divided into three parts, specifically detailing what can be expected in the training year, NQT year and RQT year respectively, with the authors' commentary threaded throughout to demonstrate how the ideas discussed can be successfully put into practice. Their accounts are also complemented by expert advice from two people who are at the very top of their profession, Lianne Allison and Dr Simon Thompson, who provide wider perspectives drawn from a wealth of teaching experience. Forty of the book's forty-six chapters begin with a checklist.

outlining what a developing teacher is expected to do and each chapter ends with a to do list that can be used as a quick reference point to structure the strategies implemented. These to do lists are also followed by lists of suggested further reading so that readers can delve deeper into topics and fields of research that they find particularly interesting or relevant. Furthermore the book offers helpful counsel on choosing the best training route as well as an in depth analysis of the change in priorities for busy teachers as they progress encouraging constant reflection outlining potential pathways and emphasising the importance of evidence based practice and how new teachers can and should incorporate this into their teaching. Rooted in practical strategies and innovative ideas Thrive is the essential guide for trainee secondary school teachers and teacher trainers *Programme Document* ,2011 *The World of Science Education* Femi S. Otulaja,Meshach B.

Ogunniyi,2017-09-12 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world. These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel North Africa and the Middle East and Sub Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing nature of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished what is missing and what might be done next *African Studies Program Events* ,1999 **O-level**

Shona Grammar B. Inauen,K. Bruehwiler,C. Gadzikwa,1983 **O-Level Shona Grammar** K. Bruehwiler,B. Inauen,1974

Implimentation of the Shona Curriculum at Upper Primary School Level Shamiso Tatira,2011-03 The book investigates the low performance in Shona at Grade seven level. The book argues that the syllabus does not guide teachers on exactly what to be taught at which level of upper primary level. It also argues that the textbooks used at this level are biased towards other dialects and that the examination also is biased in the same vein. The author argues that the examination also tests cultural and content issues instead of communicative competence. The author gives insightful recommendations which help to reduce the problem of low scores in grade seven results
