## **A Life Course Perspective On Migration And Integration:**

A Life-Course Perspective on Migration and Integration Matthias Wingens, Michael Windzio, Helga de Valk, Can Aybek, 2011-07-14 Over the last four decades the sociological life course approach with its focus on the interplay of structure and agency over time life course perspective has become an important research perspective in the social sciences. Yet while it has successfully been applied to almost all fields of social inquiry it is much less used in research studying migrant populations and their integration patterns. This is puzzling since understanding immigrants integration requires just the kind of dynamic research approach this approach puts forward. Any integration theory actually refers to life course processes. This volume shows fruitful cross linkages between the two research traditions. A range of studies are presented that all apply sociological life course concepts to research on migrants and migrant groups in Europe. The book is organized thematically indicating different important domains in the life course. Using a wide variety of methodological approaches it covers both quantitative studies based on population census data and survey material as well as qualitative studies based on interviews. Attention is paid to the life courses of those who migrated themselves as well as their offspring. The studies cover different European countries relating to one national context or a particular local setting in a city as well as cross country comparisons. Overall the book shows that applying the sociological life course approach to migration and integration research may advance our understanding of immigrant settlement patterns as well as further develop the life course perspective.

Forced Migration in Turkey Berna Şafak Zülfikar Savcı, Ludger Pries, M. Murat Erdoğan, 2024-04-15 Turkey hosts more refugees than any other country in the world with forced migrants from Syria, Afghanistan, Pakistan, Iraq, and other countries converging either with hopes to settle in Turkey or to continue onwards to the European Union EU. This volume addresses the specific experiences and trajectories of forced migrants in Turkey in the context of local and national contexts and the future of EU-Turkey relations. It presents the demographics of forced migrants, the biographies and future plans of refugees and their interactions with civil society, states, and international agencies. A focus is on organized violence and corresponding experiences in countries of origin during transit and at current places. Based on extensive quantitative and qualitative research this book will be of interest to researchers and practitioners in the fields of migration, human security, and refugee studies as well as of sociology, political sciences, and international relations.

*Situating Children of Migrants across Borders and Origins* Claudio Bolzman, Laura Bernardi, Jean-Marie Le Goff, 2017-10-25 This open access, wide-ranging collation of papers examines a host of issues in studying second generation immigrants, their life courses, and their relations with older generations. Tightly focused on methodological aspects, both quantitative and qualitative, the volume features the work of authors from numerous countries from differing disciplines and approaches. A key addition in a corpus of literature which has until now been restricted to studying the childhood, adolescence, and youth of the children of immigrants, the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied.

and the difficulties of follow up research that spans both time and geographic space In addition to perceptive reviews of extant literature chapters also detail work in surveying the children of immigrants in Europe the USA and elsewhere Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation state paradigm The book is in part an outgrowth of temporal factors immigrants children are now reaching adulthood in more significant numbers but also reflects the added sophistication and sensitivity of social science surveys In linking theoretical and methodological factors it shows just how much the study of these second generations and their families can be enriched by evolving methodologies This book is open access under a CC BY license
