A Parents Guide To Preschool:

Preschool Choices Hilary Hawkes, 2012 The first five years of a child's life are an exciting and important time. Children change and develop at this stage at a fast rate. Experiences they have often influence their personality and behaviour for the rest of their lives. This book describes how children learn and develop during their preschool years and what kinds of things influence or encourage that development. Chapters cover basic information on children's growth physically, emotionally, socially and cognitively, and some common developmental problems and possible solutions. There is information on finding groups and activities for parents, carers and preschool children to attend together from fun story time or toddler groups to activities that may enhance your child's communication, concentration and co-ordination skills and where to find out what is on offer in your area. Parents looking for childcare and nursery education will find the chapters on the many different types useful. Chapters include information on how to select the right care or nursery for your child, what children learn in an early years setting, meeting the cost and finding ways to help your child settle and adjust to being away from you. Advice for parents with children with special needs is also included. Information on how to best prepare your child for starting formal full-time school looks at how you and your child can approach this important milestone together. Author: Hilary Hawkes A

How to Choose a Nursery School Ada Anbar, 1999 A Parent's Guide to Early Childhood Education Diane Trister Dodge, Joanna Phinney, 1990 This handbook was originally intended for parents whose children attend programs which use The Creative Curriculum for Early Childhood CCEC but the information is also useful to parents whose children attend early childhood programs using other curriculum models based on child development theories. The purpose of the handbook is to explain ways parents and teachers can work together at home and at school to help children acquire the skills, attitudes and habits to do well in school and throughout life. The guide explains the CCEC program's philosophy and goals. It describes what children are learning while engaged in particular CCEC program activities and what they learn from the environment.
