and future generations     [The Routledge Companion to Architectural Pedagogies of the Global South](#) Harriet Harriss,Ashraf M. Salama,Ane Gonzalez Lara,2022-12-30 The established canon of architectural pedagogy has been predominantly produced within the Northern hemisphere and transposed or imposed across schools within the Global South more often with scant regard for social economic political or ecological culture and context nor regional or indigenous pedagogic principles and practices Throughout the Global South architecture s academic community has been deeply affected by this regime how it shapes and influences proto professionals and by implication architectural processes and outcomes too The Routledge Companion to Architectural Pedagogies of the Global South resituates and recenters an array of pedagogic approaches that are either produced or proliferate from the Global South while antagonizing the linguistic epistemological and disciplinary conceits that under imperialist imperatives ensured that these pedagogies remained maligned or marginalized The book maintains that the exclusionary implications of architectural notions of the orders the canon and the core have served to constrain and to calcify its contents and in doing so imperiled its relevance and impact In contrast this companion of pedagogic approaches serves to evidence that architecture s academic and professional advancement is wholly contingent on its ability to fully engage in an additive and inclusive process whereby the necessary disruptions that occur when marginalized knowledge confronts established knowledge result in a catalytical transformation through which new co created knowledge can emerge Notions of tradition identity modernity vernacularism post colonialism poverty migration social and spatial justice climate apartheid globalization ethical standards and international partnerships are key considerations in the context of the Global South How these issues originate and evolve within architectural schools and curricula and how they act as drivers across all curricula activities are some of the important themes that the contributors interrogate and debate With more than 30 contributions from 55 authors from diverse regional racial ethnic gender and cultural backgrounds this companion is structured in four sections that capture critique and catalog multifarious marginalized pedagogical approaches to provide educators and students with an essential source book of navigational steers core contestations propositional tactics and reimagined rubrics The Routledge Companion to Architectural Pedagogies of the Global South pioneers a transposable strategy for academics from all disciplines looking to adopt a tested approach to decolonizing the curriculum It is only through a process of destabilizing the hegemonic epistemological and disciplinary frameworks that have long prescribed architecture s pedagogies that the possibility of more inclusive representative and relevant pedagogical practices can emerge     **Across Space and Time** Patrick Haughey,2016-12-31 Modernity tends to be considered a mostly Western chronologically recent concept Looking at locations in Brazil Java India Georgia and Yugoslavia among others Across Space and Time provides architectural and cultural evidence that modernity has had an impact across the globe and for much longer than previously conceived This volume moves through space and time to illustrate the way global modernity has been negotiated through architecture urban planning design pedagogies preservation and art history in

diverse locations around the world Bringing together emerging and established architecture and art history scholars each chapter focuses on a particular site where modernity was defined challenged or reinterpreted The contributors examine how architectures landscapes and design thinking influence and are influenced by conflicts between cultural economic technological and political forces By invoking well researched histories to ground their work in a post colonial critique they closely examine many prevailing myths of modernity Notable topics include emerging architectural history in the Indian subcontinent and the connection between climate change and architecture Ultimately Across Space and Time contributes to the ongoing critique of architecture and its history both as a discipline and within the academy The authors insist that architecture is more than a style It is a powerful expression of representational power that reveals how a society negotiates its progress
