Between Moral Hazard and Legal Uncertainty Matthias Braun, Hannah Schickl, Peter Dabrock, 2018-11-15 Genome Editing Techniques are seen to be at the frontier of current research in the field of emerging biotechnologies The latest revolutionary development the so called CRISPR technology represents a paradigmatic example of the ambiguity of such techniques and has resulted in an international interdisciplinary debate on whether or not it is necessary to ban the application of this technique by means of a moratorium on its use for human germline modifications

particularly in human embryos in the reproduction process However given that other germline engineering techniques like mitochondrial mt DNA transfer techniques are already permitted and applied the question arises what lies at the root of the apparent social unease about the modification of the human germline by Genome Editing Techniques like CRISPR Against this background the book seeks to make a substantial contribution to the current debate about a responsible and participatory framework for research on emerging biotechnologies by analysing underlying perceptions attitudes arguments and the reasoning on Genome Editing Techniques
